Issued: July 1, 1976
Effective: September 15, 1976
GENERAL REGULATIONS

TARIFF APPLICATION
This tariff governs the furnishing of telephone service and facilities by the Pennsylvania Telephone Company, hereinafter referred to as the Telephone Company. The general regulations in this section of the tariff are supplemental to regulations contained in other sections of this tariff.

The terms and conditions detailed in this tariff do not apply to customer premise equipment purchased by the Company after January 1, 1983 with the exception of overvoltage equipment, inside wiring, coin telephones and multiplexing equipment.

The Company after January 1, 1983 may at its option provide customer premise equipment on a detariffed basis, either through direct sale or on a leased arrangement, at rates not governed by this tariff. Leased equipment in service at a particular location on December 31, 1982 will continue to be leased to a customer at that location and will be governed by this tariff until service to that customer is terminated for any reason at that location.

The Company will continue to provide maintenance for Telephone Company provided customer premise equipment subject to availability of replacement parts and/or equipment.

All connections to the network by the Company or the customer must comply with the rules and regulations of the F.C.C. and the Pennsylvania P.U.C. (C)

TELEPHONE SERVICE DEFINED
The Telephone Company does not transmit messages but offers, subject to the ability to secure and retain, without unreasonable expense, suitable facilities and rights for the construction and maintenance of the necessary circuits and equipment.

The Telephone Company may require contracts for not less than four four-party line main stations before introducing four-party line service along a given route by an extension of plant from the base rate area.

SPECIAL TYPES OF SERVICE AND EQUIPMENT
In cases where a subscriber desires some special type of service or equipment for which provision is not otherwise made, and in the judgement of the Telephone Company there is no reason for refusing to render the special service desired, a rate is quoted based on the cost of furnishing such service or equipment.

EQUIPMENT, APPARATUS AND LINES
Equipment furnished by the Telephone Company shall remain the property of the Telephone Company and, upon termination of service for any cause whatsoever, shall be returned to the Telephone Company in good condition, reasonable wear and tear thereof excepted.

No equipment, apparatus or lines furnished by the subscriber shall be attached or used in connection with equipment, apparatus or lines furnished by the Telephone Company unless specifically authorized and connected and used exclusively with the Telephone Company’s systems. (C) Indicates Change

Issued: June 17, 1983 Effective: July 7, 1983
INSTALLATION, RELOCATION, MAINTENANCE, REPAIRS & REMOVAL
Except as otherwise provided in this tariff all equipment and wiring furnished by the Telephone Company must be installed, maintained, repaired, relocated and removed by the Telephone Company and the subscriber may not rearrange, disconnect, remove or attempt to repair it or permit others to do so.

The subscriber shall be responsible for damages to the facilities of the Telephone Company resulting from negligence or willful act of the subscriber.

The Telephone Company shall not be liable for any defacement of or damage to the premises of the subscriber resulting from the attachment of the Telephone Company’s equipment, apparatus or lines on such premises, or their installation or removal, when such damage is not the result of negligence of the Telephone Company.

ACCESS TO PREMISES OF SUBSCRIBER
For the purpose of installing, repairing, inspecting or removing any part of its equipment, apparatus or lines on the premises of the subscriber, or for making collections, the agents and employees of the Telephone Company shall have entrance thereto at any reasonable hour.

BUSINESS AND RESIDENCE SERVICE CLASSIFICATIONS
Business rates are applicable in connection with service furnished at a business location or any other place where the service is used primarily or dominantly for business, professional or institutional purposes. If either the main station or any extension connected therewith is located in a place where business rates are applicable, business rates apply to the main station and to all extensions therefrom.

Residence rates apply in private residences where the service is used primarily or dominantly for social or domestic purposes.

USE OF SERVICE
Unless otherwise indicated in this tariff, the use of business service is restricted to the subscriber, his agents and representatives, and the use of residence service is restricted to the subscriber and members of his household.

The subscriber shall not use the service or permit others to use it in such manner as to interfere with the service of other subscribers.

Unless otherwise provided in this tariff, service shall in no case be resold.
GENERAL REGULATIONS

(CONTRACTS FOR SERVICE)

The Telephone Company reserves the right to require applications for service to be made in writing on forms supplied by it. Upon acceptance of an application for service, all applicable provisions of the Telephone Company’s tariffs lawfully on file become the contract between the Telephone Company and the subscriber. Requests for additional service or changes in service, upon acceptance by the Telephone Company, become a part of the original contract, except that each item of additional service is subject to the appropriate minimum contract terms. The acceptance or use of service may be deemed an application for such service and an agreement to pay for it at the rates applicable thereto under the current tariff. Any change in rate or regulations lawfully made acts as a modification of all contracts to that extent without further notice.

Except as otherwise provided in this tariff, service is furnished for a minimum contract term of three months.

FCC DESIGNATED 811 SERVICES

As mandated by the Federal Communications Commission (FCC), in compliance with the Pipeline Safety Improvement Act of 2002, the abbreviated 811 Dialing Code is established for use by commercial and residential consumers to provide advanced notice of excavation activities to certified “One Call” notification systems entities as a toll free call. The certified “One Call” notification systems entity must subscribe to termination facilities and lines in sufficient quantities to provide adequate service to the public. 811 Service is provided for the benefit of the certified “One Call” notification systems entity on a special charge treatment basis as detailed in Section 1, Sheet 1 of this tariff. The provision of 811 Dialing Code by the Company shall not be interpreted, constructed or regarded, either expressly or implied, as being for the benefit of or creating any Company obligation toward any third person or legal entity other than the certified “One Call” notification systems entity.

The maximum liability of the Company for direct damages or losses of any kind arising out of mistakes, omissions, interruptions, delays, errors or defects in transmission, or failure or defects in any facility furnished by the Company, occurring in the course of furnishing 811 Service, or of the Company in failing to maintain proper standards of maintenance and operation or to exercise reasonable supervision, will in no event exceed an amount equivalent to the proportionate charge to the certified “One Call” notification systems entity for the 811 Service and local exchange services for the period of service during which such mistake, omission, interruption, delay, error or defect in transmission or defect or failure in facilities occurs. The Company will have no liability for any consequential, incidental, or indirect damages or losses, whether or not the customer was aware or should have been aware of the possibility of these damages or losses. The Company is not liable for any losses or damages caused by the negligence or willful misconduct of the certified “One Call” notification systems entity.

DEPOSITS

A deposit, in accordance with Commission regulations at 52 Pa. Code, §§64.31 -64.41 may be required as security for future bills. Interest rates applied to customer deposits held by the Telephone Company are prescribed by the PUC.

Deposits will be returned in accordance with Commission regulations at 52 Pa. Code, §§ 64.31 - 64.41.

The fact that a deposit may have been made in no way relieves the applicant or subscriber from complying with the Telephone Company’s regulations as to the prompt payment of bills or constitutes a waiver or modification of the regular practices providing for discontinuance of service for non-payment of any sums due the Telephone Company for service rendered.

(C) Indicates Change

GENERAL REGULATIONS
(Continued)

DEPOSITS (continued)
The payment of any undisputed bill, within the meaning of the Public Utility Law, shall be payment of the bill with or without discount or penalty, within thirty days following the period for which the bill was rendered or payment within thirty days following presentation of the bill, or the payment of any contested bill, payment of which is withheld beyond the period herein mentioned and the dispute is terminated substantially in favor of the customer and payment be made by the customer within ten days thereafter.

CHARGES FOR FRACTIONAL MONTHS
When service is established, the initial charge for local service, equipment and facilities for the fractional part of the current billing month is a pro rata share of the monthly charge.

PAYMENT FOR SERVICE
Installation and construction charges, where applicable, must be paid in advance of the establishment of service.

Service connection charges are payable when service is established.

Message charges at pay telephones are payable in advance.  (C)

Monthly recurring charges for service, and charges for toll message service, are billed monthly in arrears and are payable when the service has been rendered.

Charges for all local and toll messages sent from the subscriber’s telephone station and for all toll messages received at such station on which charges are reversed with the consent of the person answering the call are the responsibility of the subscriber.

A statement of account rendered to the subscriber shall be deemed correct and binding upon the subscriber unless objection in writing is received by the Telephone Company within thirty days after rendition of the statement.

SUSPENSION OF SERVICE
The Telephone Company reserves the right to suspend service for non-payment of bills, ten days after date due, or for violation of rules and regulations of this tariff, after due notice by the Telephone Company.

(C) Indicates Change

Issued: March 18, 1997           Effective: April 15, 1997
SUSPENSION OF SERVICE (continued)
The Telephone Company also reserves the right to suspend, without notice, service to facilities that have apparently been abandoned and to demand payment for such service up to and including date of suspension, provided it has not been notified by the subscriber to discontinue service prior thereto.

LIABILITY OF TELEPHONE COMPANY
In event interruptions, omissions, defects, errors, mistakes or delays in transmission occur in the course of furnishing service, lines and other facilities and are not caused by negligence of the subscriber, the liability of the Telephone Company for damages arising therefrom shall not, except as otherwise provided for in Section 1 Sheet 8 of this tariff, exceed an amount equivalent to the proportionate charge to the subscriber for the period during which such interruption, omission, defect, error, mistake or delay in transmission occurs. Where a local message guarantee applies, a pro rata portion of the guarantee for the period of suspension is allowed. No other liability shall in any case attach to the Telephone Company.

CANCELLATION FOR CAUSE
Where there are reasonable grounds for suspecting that a service is being used, or will be used, for an illegal purpose, the Telephone Company will terminate such service without advance notice to the subscriber. The Telephone Company may also terminate without advance notice any service which is used in such a manner as to interfere with the service of others or that is used for any purpose other than a means of communications.

TELEPHONE NUMBERS
The Telephone Company reserves the right to change the telephone number or numbers of a subscriber’s station or stations as the exigencies of the business may require.

TELEPHONE DIRECTORIES
Telephone directories issued by the Telephone Company to its subscribers and patrons without charge are the property of the Telephone Company and shall be surrendered to the Telephone Company upon termination of service or distribution of a subsequent issue, in as good condition as reasonable wear and tear permits. No binder, holder or auxiliary cover, except where furnished by the Telephone Company, may be used in connection with any directory furnished by it.

Issued: July 1, 1976 Effective: September 15, 1976
GENERAL REGULATIONS
(Continued)

TELEPHONE DIRECTORIES (continued)
The Telephone Company, except as provided herein, shall not be liable
for damage claimed on account of errors in, or omissions from, its
directories, nor for the result of publication of such errors in the
directory, nor will the Telephone Company be a party to controversies
arising between subscribers or others as the result of listings
published in its directories.

OVERTIME WORK
When, at the subscriber’s request, work is performed at other than
regular business hours of the Telephone Company, an extra charge for
such work will be made to compensate for the current overtime wage
rates.

TOLL MESSAGE RATES
Rates, rules and regulations governing Toll, or Long Distance, messages
are contained in the toll tariff of the Bell Telephone Company of
Pennsylvania.

Issued: July 1, 1976
Effective: September 15, 1976
STATE TAX ADJUSTMENT SURCHARGE

In addition to the charges provided in this tariff and other state toll and access tariffs in which this company concurs, a surcharge, as shown below, will apply to all intrastate charges for service on or after September 1, 2020, except on calls from pay telephones.

<table>
<thead>
<tr>
<th>For services provided to:</th>
<th>Surcharge Rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>END USER</td>
<td>-0.099 %</td>
</tr>
<tr>
<td>ACCESS USER &amp; LOCAL EXCHANGE CARRIERS</td>
<td>-0.093 %</td>
</tr>
</tbody>
</table>

The above charges will be recomputed, using the same elements prescribed by the Commission:

1. Whenever any of the tax rates used in calculation of the surcharge are changed.
2. Whenever the utility makes effective any increased or decreased rates.
3. And on March 31, 1971, and each year thereafter.

The above recomputations will be submitted to the Commission within 10 days after the occurrence of the event or date which occasions such recomputations; and that if the recomputed surcharge is less than the one in effect the Utility will, and if the recomputed surcharge is more than the one then in effect the Utility may submit the such recomputation a tariff or supplement to reflect such recomputed surcharge, the effective date which shall be 10 days after filing.

(C) Indicates Change (D) Indicates Decrease

Issued: August 21, 2020  Effective: September 1, 2020
GENERAL REGULATIONS

(Continued)

ALLOWANCES FOR TELEPHONE SERVICE INTERRUPTIONS

When main telephone service is interrupted for a period of at least 24 hours, the company, after due notice by the customer, shall apply the following schedule of allowances except in situations as provided in Paragraph 2:

1. (a) 1/30 of the tariff monthly rate of all services and facilities furnished by the company rendered inoperative by the company to the extent of being useless for each of the first three (3) full 24 hour periods during which the interruption continues after notice by the customer of the company conditioned that the out-of-service extends beyond a minimum period of 24 hours.

(b) 2/30 of each full 24 hour period beyond the first three 24 hour periods. However, in no instance shall the allowance for the out-of-service period exceed the total charges in a billing period for the service and facilities furnished by the company rendered inoperative to the extent of being useless.

When service is interrupted for a period of at least 24 hours due to such factors as storms, fires, floods or other conditions beyond the control of the company, an allowance of 1/30 of the tariff monthly rate for all services and facilities furnished by the company rendered inoperative to the extent of being useless shall apply for each full 24 hours during which the interruption continues after notice by the customer to the company.

Nothing contained herein and no tariff adopted hereto shall limit any responsibility or liability on the part of a telephone company to a customer which would exist pursuant to law but for this rule and said tariff.

The foregoing allowances shall not be applicable where service is interrupted by the negligence or willful act of the customer to service or where the company pursuant to the terms of the contract for service suspends or terminates service for non-payment of charges or for unlawful or improper use of facilities or for any other reason provided for in the filed and effective tariff.
GENERAL REGULATIONS

BROADBAND SCHOOL DISCOUNT

The Company shall offer school customers in its service territory, that meet the eligibility standards described in 47 CFR §54.501 (relating to eligibility for services provided by telecommunications carrier) and that agree to enter into a minimum three-year contract, a thirty percent (30%) discount in the otherwise applicable tariffed distance sensitive per-mile rate element, and also will waive the associated nonrecurring charges, for available intrastate broadband services (as defined by Act 183 of 2004) where used for educational purposes and not for the provision of telecommunications services to the public for compensation. The discount or waiver shall not be required where application of it to a particular service would conflict with applicable law.
RATES AND RULES GOVERNING LOCAL EXCHANGE SERVICE

IN

OVAL, PENNSYLVANIA

MONTHLY RATES FOR LOCAL EXCHANGE SERVICE

Within the exchange area, as shown on Map, Section 8:

<table>
<thead>
<tr>
<th></th>
<th>Business</th>

</table>

* Service discontinued, applies only to existing customers at present location.

TERMINATING EQUIPMENT
The rates listed above do not include any terminal equipment – telephones, ringers, couplers, or inside station wiring. Local exchange service with tone dial capability is available at the rates listed above, plus $1.50 per line per month for business and residence.

LOCAL SERVICE AREA
The local service area embraces stations bearing the designation of Oval; and Jersey Shore and Williamsport (Bell Tel. Co. Of Pa.)

(C) Indicates Change  (I) Indicates Increase

Issued: November 26, 2003
Effective: December 1, 2003
1. **DEFINITIONS**

The term Service Charge is defined as the non-recurring charge or charges applying to the ordering, installing, moving, changing, rearranging and furnishing of telephone service and miscellaneous and supplemental equipment and other telephone facilities. The charges are separately established as follows in order to provide a reasonable basis for an equitable recovery of the costs incurred in the required operations.

1. **Service Order Charge**

   Applicable for receiving information and taking action in connection with a customer’s or applicant’s request.

2. **Premises Visit Charge**

   Applicable for a required trip to customer’s premises in connection with establishment of service, rearrangement of service, or installation of equipment when requested by the customer.

3. **Central Office Network Access Charge**

   Applicable for testing and connecting functions required within the central office and for the work associated with the circuit extending from the serving central office to the protector on the customer’s premises.

4. **Premises Wiring Charge**

   Applicable for installation of wiring required for a new installation or a move of a standard connector and/or terminal equipment.

5. **Jack Charge**

   Applicable for installation of a jack or change of location of a jack on the customer’s premises which is required due to a customer’s request.

6. **Equipment Work Charge**

   Applicable for work done on the customer’s premises in connection with the installation, move or change of each single-line telephone set and each item or auxiliary terminal equipment as specified in other sections of the tariff.

(I) Indicates Increase   (C) Indicates Change
1. **DEFINITIONS (cont’d)**

7. **Restoration Charge**
   Applicable for restoral of service following a temporary suspension of such service.

2. **APPLICATIONS**

1. **General**

   Service charges are applicable to the establishment or changing of service, the assumption of service by a different customer and the move of service from one premise to another.

   Changes in locations of existing stations or terminations to points outside the customer’s premises are considered new installations at the new location.

   The non-recurring charge applicable for the establishment of foreign exchange service is the total of those non-recurring charges applicable within the local and foreign exchanges.

   The combination of charges applicable for a move or change of equipment or service will not exceed the charges applicable for a new installation of that equipment or service except as specified below.

   Incorporated in this section is the assumption that the customer will allow the Company to complete the requested operations in a manner determined by the Company to be reasonable and efficient. When the customer insists after thorough explanation by the Company of the additional charges which would be applicable, that the Company carry out additional or extraordinary work which would not otherwise be required to complete the desired operation, charges in addition to those applicable as specified in this section may be applied. Additional work operations such as premises visits made to deliver new telephone number designations or additional service orders processed to effect multiple completion dates requested by the customer will be charged for at the levels specified in C., Schedule of Charges. Other activity necessitated by requests of the customer such as work during other than normal business hours or provision of concealed wiring will be charged.

(I) Indicates Increase
(C) Indicates Change
2. APPLICATIONS (cont’d)

1. General (cont’d)
   for at levels not to exceed differential costs of labor and material. This provision in no way relieves the Company from the requirement of providing reasonable and efficient service at the charges specified in this tariff.

   (a) Service charges do not apply for:

   (1) Normal maintenance and repair of the Company’s equipment and service including work functions which are not required due to the customer’s request.

   (2) An upgrade or downgrade of class of service.

   (3) Company initiated orders, e.g., a number change required by a cutover or regrade, replacement at the Company’s initiative of obsolete equipment or services, etc.

   (4) Record orders issued for corrective purposes.

   (5) Change or correction in name or billing address only when there is no connection, disconnection, move or change in service.

   (6) No service charges apply for disconnection, discontinuance or removal of equipment or service.

   (7) No service charge applies for the re-establishment of same or equivalent service as determined by the telephone company, for the same subscriber, at a location which has been destroyed or made untenable by fire, wind or water. Service charges do apply for establishment of service at a new location for a temporary period, for establishment of service at a new and permanent location, or for re-establishment of service at the same location for other than the previous customer.

   (8) When all service facilities are already in-place, a service charge does not apply for a customer to connect an item of customer-provided terminal
2. **APPLICATIONS (cont’d)**
   1. **General (cont’d)**
      
      (a) Service charges do not apply for: (cont’d)

      (8) equipment to his existing service. If additional facilities are required or requested, the appropriate service charges will apply.

2. **Service Order Charge**
   Only one service order charge is applicable for requests for the same customer made at one time, for service at one premises, with the same requested completion date.

   1. **Primary service order charge**
      
      (1) Applicable only for initial connection or establishment of telephone service.

   2. **Secondary service order charge**
      
      (1) Applicable to all other customer requests for installing, moving, changing or rearranging telephone service and miscellaneous and supplemental equipment.

3. **Premises Visit Charge**

   Premises Visit Charge are applicable:

   1. If a premises visit is required to complete any requested work on the customer’s premises except as provided in d. below.

   2. For visits to each premises required due to the customer’s request.

   3. For each return visit to the customer’s premises which is required due to requests of or limitations imposed by the customer.

   4. The premises visit charge does not apply for:

      (1) Return trips to the same premises required due to time, equipment or service limitations of the company.

      (2) Removal of equipment or service.
B. APPLICATIONS (cont’d)

4. Central Office Network Access Charge

1. The central office network access charge applies to work performed in the central office and extending to the protector at the customer’s premises. The charge applies for work including but not limited to:

   (1) Connection or reconnection of local exchange lines, FX lines, local private lines, local off-premises extension lines and local tie lines (one charge per item).

   (2) Number change on a local exchange central office network access or trunk (one charge per item).

   (3) Restoration of service.

2. Charges, if any, applicable to central office work in exchanges of other companies are those applicable for that company.

3. Central office network access charges do not apply for:

   (1) Transfer of service from one customer to another when there is not lapse in service.

5. Premises Wiring Charge

1. Premises Wiring charges are applicable:

   A premises wiring charge applies for installation of premises wiring required for a new installation or a move of a jack or an item of terminal equipment and on a per location basis to PBX station lines terminating in the common equipment of a key system.

   The Company shall reserve the right to refuse to install or maintain wiring in a location where, in the opinion of the Company, the safety of the workmen or continuity of service might be questionable.

2. Premises wiring charges do not apply for:

   (1) Connections or change in the type of connecting arrangement (connector block or jack) if additional installation or rearrangement of inside wire or jacks is not
required.

Company

Telephone - PA P.U.C. No. 2

Pennsylvania Telephone Original Sheet 6

SERVICE CHARGES (cont’d) (I-C)

2. APPLICATION (cont’d)

6. Basic Equipment Work Charge

1. An equipment work charge is applicable for work done at the customer’s location in connection with the installation, move or change of each single-line telephone set and each item of auxiliary terminal equipment or service as specified in other sections of the tariff.

The amount of the equipment work charge will be shown or referred to as “basic”. If listed as “basic”, the charge will apply as shown in the Schedule of Charges.

2. Equipment work charge do not apply:

   (1) When work is performed at the Company’s initiative.

   (2) For a change in terminal equipment made at the time of an inside move of the station, i.e., only one equipment work charge may be applied.

   (3) When an in-place station which is connected through a connector block or four-prong jack is converted to a standard modular jack connection.

7. Jack Charge

1. Standard jack charge applies:

   (1) For work required in the installation of each standard jack on the customer’s premises which is due to a customer’s request.

   (2) For the conversion of a standard modular jack to another version of the standard modular jack which is required due to a customer’s request.

2. The jack charge does not apply:

   (1) When the required jack is in place in the customer’s premises.

   (2) For the conversion of connector blocks to standard modular jacks in conjunction with repair or maintenance purposes.
B. APPLICATIONS (cont’d)

8. Changes in Telephone Number
   1. For requests for changes in telephone number of central office lines or trunks, one secondary service order charge plus, for each number changed, a central office network access charge will apply.
   2. For changes in telephone number of other than central office lines or trunks, one secondary service order charge and one premises visit charge, as appropriate, will apply plus a charge per PBX station line changed.
   3. The above charges do not apply when, in the judgement of the Company, changes in telephone number are necessary for continuation of satisfactory service.

9. Inside Moves or Changes of Auxiliary Terminal Equipment
   1. The charges for a move or change of each item of auxiliary terminal equipment such as key system stations, key and PBX common equipment, data sets, etc., are specified in this tariff as equipment work charges.
   2. The equipment workcharge for each item that is moved or changed replaces the basic equipment work charge as specified in the Schedule of Charges.

10. Restoration of Service
   1. In the event service is temporarily suspended for non-payment of charges, such service will be restored upon payment of:

      (1) All charges due or, at the discretion of the company, a substantial portion thereof, and

      (2) The restoration of service charge as shown on Sheet 8 of this Section.

   2. When at the request of the customer, service is temporarily suspended, service will be restored upon payment of the restoration of service charge shown on Sheet 8 of this Section.

LIFELINE SERVICE

A. DESCRIPTION
Lifeline Service is a federally funded program established to provide monthly assistance to residential low income households who qualify for this service in accordance with the following Regulations.

B. REGULATIONS
1. Lifeline Service is available to qualified residence customers and is provided via a residence individual Dial Tone Line. Lifeline Service is limited to only one Service per qualified customer or household (a household is defined as “any individual or group of individuals who are living together as one economic unit” an economic unit is “all adult individuals contributing to and sharing in the income and expenses of a household”). However, a qualified residence customer or household is not eligible for Lifeline Service if they are currently receiving a Lifeline program discount on another service supported by the Federal Communications Commission. A potential Lifeline customer who has an outstanding final bill for telephone service which is less than (4) years old must pay the entire balance of any Basic Service final bill before being eligible for Lifeline Service.

2. Residence Lifeline Service consists of the following tariffed standard features and optional customer elected services at the applicable rates, charges and regulations for each feature and service provided:
   a. One-Party Residence Line Rate or Local Measured Service Option
   b. Directory Listing (standard only).
   c. Non-Published or Non-Listed Telephone Number Service.
   e. Touch-Tone Calling Service.
   f. Access to Message Toll Telephone Service and Optional Dial Station-To-Station Calling Plan Services. However, the Residence Lifeline Dial Tone Line will be blocked from dial station access to 976/556/900 and any other type of Audiotex Service.
   g. Access to Operator Services.
   h. Voluntary Toll Restriction Option.
   i. Access to 800/888 Services.
   j. Access to Call Trace.
   k. Access to Alerting and Reporting Systems (9-1-1 dialing).
   m. Caller ID Per-call and Per-line Blocking
   n. Other eligible telecommunications services at tariffed rates.

(C) Indicates Change

Issued: November 2, 2016
Effective: December 2, 2016
LIFELINE SERVICE

B. REGULATIONS (cont’d)

3. An applicant for Lifeline Service must be a current participant in one of the following eligibility programs, or be able to provide proof of household income which is at or below 135% of the annual Federal Poverty Guidelines for all States (except Alaska and Hawaii) and the District of Columbia. Recertification of Lifeline Service participants must be conducted annually to ensure continued eligibility. Lifeline customers have the responsibility to notify the Telephone Company within thirty (30) days of a change in eligibility status if they no longer qualify for Lifeline Service.

Pennsylvania Department of Human Services (DHS) Programs
   Supplemental Security Income (SSI)
   Medicaid
   Supplemental Nutrition Assistance Program (SNAP) (f/k/a Food Stamps)

Additional Eligible Programs (Federal)
   Federal Public Housing
   Veteran’s Pension or Survivor’s Pension Benefit

* * * * *

4. Lifeline Service will be provided to a customer only so long as such customer continues to meet the participation and certification guidelines in B.3. above. At the time of initial establishment of Lifeline Service, the customer agrees to have his or her eligibility recertified annually. When the Company is notified by the customer or determines through recertification that the Lifeline Service customer is no longer a participant in the eligibility programs in B.3. above or otherwise low-income eligible, the customer will be notified (by telephone or letter) that the Lifeline Service rate is no longer applicable. Within the stated customer notification period (60 days from the date of the notification), the customer can contact the Company to negotiate new Dial Tone Service arrangements at applicable tariff rates (no connection charges will apply for existing services or options retained). If the customer does not contact the Company by the end of the notification period, the Lifeline Service will be changed to applicable Exchange Area Dial Tone Line service at existing tariff rates (no connection charges will apply to existing services or options retained).

Supplement No. 111 - Telephone - PA P.U.C. No. 2
LIFELINE SERVICE

B. REGULATIONS (cont’d)

5. A Lifeline Service customer may not subscribe to any other type of residence Local Exchange Service at the same or other premises. Lifeline Service will not be provided via Foreign Exchange or Foreign Central Office Service arrangements.

6. Only services listed in B (2) above will be provided to Lifeline customers.

7. Customer requested temporary suspension of Lifeline Service is not permitted.

8. Lifeline Service does not apply to applicants who are full time students living in university or college controlled housing.

*****

9. Lifeline customers are subject to all Residence service regulations in this and other tariffs of Pennsylvania Telephone Company.

10. Residence Lifeline Service cannot be resold by the Lifeline customer or the Lifeline customer’s agent(s).

11. All outstanding charges, account balances and service restrictions apply to existing customers who qualify for Lifeline Service. Service restrictions will remain until the arrearage(s) have been paid in full.

12. Any Lifeline customer who has a past due balance of Toll Charges will be treated with the appropriate Chapter 64 regulations. The Residence Toll Restoral Charge applies to Lifeline Customers who are suspended for non-payment and who subsequently pay their outstanding toll charges and request toll restoral. If a Lifeline customer is toll restricted for a second occurrence the Company may, at its discretion, place the Lifeline customer on permanent toll restriction.

13. Toll-Blocking and Toll-Control services will be provided at no charge to Lifeline Service subscribers, to the extent that they are offered.

MILEAGE CHARGES

EXCHANGE LINES

* * *

EXTENSION STATION

When an extension station, bell or gong or PBX station is located in a building separate and apart from that housing the main station, an additional charge applies to that portion of the line extending beyond the building in which the initial station is installed. This charge is computed on air line measurement from the point of exit from the main building to the location of the extension instrument as follows:

<table>
<thead>
<tr>
<th>Monthly Charge</th>
</tr>
</thead>
<tbody>
<tr>
<td>When the two buildings are on the same premises and are not separated by intervening buildings or by a public thoroughfare, for each 1/10 mile or fraction thereof</td>
</tr>
<tr>
<td>When the buildings are on separate premises or are separated by a public thoroughfare, for each 1/4 mile or fraction thereof</td>
</tr>
</tbody>
</table>

This charge is made for each wire circuit irrespective of the number of extension telephones, bells or gongs any one circuit may service, and applies whether or not they are located within or without the base rate area.

(C) Indicates Change

Issued: November 26, 2003
Effective: December 1, 2003
FOREIGN EXCHANGE SERVICE

Foreign exchange service is not offered as a normal or customary form of telephone service. However, when facilities are available and service conditions will permit, the Company may furnish this service subject to the following regulations and rates.

Foreign exchange service is limited to one-party or PBX trunk lines. When foreign exchange service is furnished by means of a branch exchange trunk line, connections to the trunk at the branch exchange switchboard are restricted to the stations connected with and in the immediate vicinity of the branch exchange switchboard.

Inter-Company Foreign Exchange Service

This service will be provided only where the subscriber agrees to remain a subscriber of this Company and to limit the use of the foreign exchange service to calls within the local service area of that foreign exchange. This company will rent a terminal in the foreign exchange and provide it to the subscriber at the one-party or trunk rate at the foreign exchange. In addition, the following monthly charges apply:

1. Within the territory of this company, a mileage charge of $.50 per 1/10 mile, for each circuit measured air line from the rate center of normal exchange to the boundary line of the adjoining company.

B. Outside the territory of this company, such mileage charges as are provided by tariffs of other participating companies.

3. A supplemental charge of $2.00 for each $.01 multiple of the dialed day station-to-station initial period message toll rate which was in effect on February 28, 1975, between the normal exchange and the foreign exchange. Such charges does not apply if the local and foreign exchanges are in the same local service area.

4. When the subscriber is located outside the local base rate area, one-party exchange line mileage charges as listed in this tariff apply for the foreign exchange local channel.

5. Special repeaters where required for satisfactory transmission will be provided at $15.00 per month each.

6. Intralata Foreign Exchange Loop Charge - For IntraLATA (C)

Inter-company Foreign Exchange Service in a specific exchange, there will be a charge for the local loop that is equal to 85% of the business one-party rate of that exchange for business customers, and 85% of the residence one-party rate of that exchange for residence customers.

When foreign exchange service is requested by a subscriber of another company to an exchange in this company, the charges listed in “A” above will apply and the charges in “C” above apply unless a similar charge is made by the company in whose territory the subscriber is located.
Issued: December 17, 1984          Effective: January 1, 1985
MILEAGE CHARGES
(Continued)

TIE, PRIVATE AND LEASED LINES

When available or when they can be conveniently provided at reasonable cost, the Telephone Company’s wire facilities will be leased for private and special use to either the general public or other carriers under the following terms and conditions:

- Monthly Charge

For each 1/4 mile or fraction thereof..............$ 1.00

The minimum monthly charge for any leased line or circuit is equivalent to the applied rate for 1/2 mile.

Charges for leased lines are computed on air line measurement between the respective terminals; terminals meaning the first and last points of contact with the Telephone Company’s facilities.
SECTION 4

INTERCOMPANY
PRIVATE LINE SERVICE

I. General

A. Channels are furnished for intraexchange or interexchange service on a two-point or multi-point basis for a minimum period of one month.

B. With reference to the channel descriptions given below:

1. "Effective two-wire facilities" may be composed of two-wire metallic and/or four-wire metallic and/or carrier segments; "four-wire facilities" are composed entirely of four-wire metallic and/or carrier segments.

2. The 1000 Hz loss objective range specified refers to the total channel offering (end-to-end) and indicates that the engineered objective loss will fall within that range at the discretion of the Telephone Company depending upon available facilities and the applicability of appropriate engineering designs. These specifications do not include gains or losses present in customer-provided equipment.

3. The Telephone Company reserves the right to revise these objectives and other technical parameters as described herein.

C. The Telephone Company will bill the subscriber for the portion of the Private Line Service that is provided by the Telephone Company. The applicable non-recurring service charges can be found in Section 3 of this tariff.

D. Third-Party Lease facilities, required to provide the Private Line Service, will be charged to the subscriber on a cost basis.

II. Series 1000 Channels

A. Type 1005 - used for low speed data transmission not to exceed 75 baud. Such services being furnished to existing customers at the same premises. Maintenance of these services is limited to the availability of replacement components furnished from existing stock.

B. Type 1006 - used for low speed data transmissions not to exceed 150 baud. Such services furnished to existing customers at the same premises. Maintenance of these services is limited to the availability of replacement components furnished from existing stock.

(C) Indicates Change

Issued: December 13, 1985   Effective: January 1, 1986
INTERCOMPANY PRIVATE LINE SERVICE

C. Type 1011 (30 baud) - available on an intraexchange basis only for two- or three-point DC transmission and only where existing facilities and operating conditions permit. In offering to provide this service, the Telephone Company assumes no obligation to specially select, alter, rearrange or construct facilities and does not represent that a facility provided under this subsection is suitable for the intended customer application. Further, in providing this service where existing facilities permit, the Telephone Company assumes no obligation to continue such provision where rearrangements or changing service requirements necessitate the elimination of such facilities or render such facilities unsuitable for the customer application.

D. Type 1012 (30 baud) - provided both for intraexchange and interexchange applications. On an intraexchange basis, Type 1012 is provided with a minimum of 3 points (master station and 2 remote premises) and up to a maximum of 26 points (master station and 25 remote premises). On an interexchange basis, Type 1012 is provided with a minimum of 2 points (master station and a remote premises) and a maximum of 26 points (master station and 25 remote premises). Type 1012 service is restricted to a maximum of 3 central office serving areas located in the same or different exchanges (one for the master station and two others to provide service to other remote premises).

Type 1012 service may be provided either by metallic channels or by other equivalent means at the Telephone Company’s option. If provided by a low speed signaling system, the transmission specifications as accepted industry standards for low speed signaling channels apply. The Telephone Company will notify the customer if other than metallic facilities are utilized to provide Type 1012 channels prior to installation.

III. Series 2000 Channels

1. **Type 2001** - A two wire interface with effective two wire facilities engineered for a 1000 Hz loss objective of 0 to 10 db; or a four-wire interface with four-wire facilities engineered for a 1000 Hz loss objective of 0 to 16 db; for two-point or multi-point service, normally suitable for use for private line telephone service.

1. Regulations applicable to type 2001 channels

   1. Type 2001 channels are furnished for voice transmission of approximate band-width of 300-3000 Hz

   2. For private line duplex intraexchange or interexchange service the monthly rates for two local channels and two transmission functions for each premises served, apply.

   3. When these channels are furnished for multi-point service, bridging charges apply at each premises at which the channel terminates.

   4. These channels are not suitable for switching and/or tandem operations to the public switched network or other private line services.

2. Automatic Signaling

   1. Automatic signaling is only provided on a two-point basis between locations on different premises for use with Type 2001 channels.
Issued: December 13, 1985    Effective: January 1, 1986
INTERCOMPANY PRIVATE LINE SERVICE

2. Automatic signaling is provided by means of central office automatic ringing equipment which operates when the receiver at one station is lifted and causes the bells of stations at the other end of the line to ring collectively without code signals.

2. Type 2002 - A two wire interface with effective two-wire facilities or a four-wire interface with four-wire facilities designed for remote operation of mobile radio telephone systems; for a two-point or multi-point service.

1. Regulations applicable to Type 2002 channels
   
a. When these channels are furnished for multipoint service, a bridging charge applies at each premises bridged on the same circuit.

2. The following channels are furnished between specified locations for remote operation and control of private land radiotelephone stations established for communications with mobile units.

1) Voice Channels
   
   (1.1) Channels are similar as to transmission characteristics, to those furnished for Type 2001 channels.

   (1.2) Channels specially designed to provide transmissions in a frequency range broader than that furnished for Type 2001 channels.

2) Control Channels

   These channels are similar as to transmission characteristics, to those furnished for Type 1005 channels and are provided at the same rates as Type 1005 channels.

3) For Combined Voice Transmission and Control Purposes

   (3.1) Channels furnished for combined voice transmission and control purposes may be used by the customer, in accordance with the normal transmission characteristics of such channels, for voice
transmission purposes and to transmit more than one tone or signal in sequence or simultaneously or to create additional channels for remote control and indication purposes only.

(C) Indicates Change

Issued: December 13, 1985  Effective: January 1, 1986
(3.2) On two-point services, voice channels may be used alternately for control at no additional charge, where the control function is derived through the use of standard one-way, two-state Direct Current signaling over the voice channel.

(3.3) On multipoint services, two-state, Direct Current signaling for control purposes is provided by means of a separate Type 1005 channel. Appropriate monthly and non-recurring charges apply separately for the Type 1005 and the Type 2002 channel.

(3.4) On two-point and multipoint services, voice channels may be used for the remote operation and control of private land radiotelephone stations, at no additional charge when the control functions are provided via tone signals.

4) Additional Equipment and Facilities:

Repeaters, amplifiers, special loading, equalization or special types of plant, required in connection with channels provided under either 1) or 2) above, are furnished at charges based upon the costs incurred.

2. Conditioning applicable to Type 2002 Channels

1. Type C1 - For a two-point or multipoint channel the envelope delay distortion shall not exceed:

   - between 1000 and 2400 Hertz, a maximum difference of 1000 microseconds

   The loss deviation with frequency (from 1000 Hertz reference) shall not exceed:
   - between 1000 and 2400 Hertz, -1db to +3db
   - between 300 and 2700 Hertz, -2db to +6db
   - between 2700 and 3000 Hertz, -3db to +12db
   (+ means more loss)

2. Type C2 - For a two-point or multipoint channel the envelope delay distortion shall not exceed:
between 1000 and 2600 Hertz, a maximum difference of 500 micro-seconds
between 600 and 2600 Hertz, a maximum difference of 1500 micro-seconds
between 500 and 2800 Hertz, a maximum difference of 3000 micro-seconds

(C) Indicates Change

Issued: December 13, 1985  Effective: January 1, 1986
INTERCOMPANY PRIVATE LINE SERVICE

the loss deviation with frequency (from 1000 Hertz reference) shall not exceed:
- between 500 and 2800 Hertz, -1db to +3db
- between 300 and 3000 Hertz, -2db to +6db
 (+ means more loss)

NOTE: On a multipoint channel arranged for switching, conditioning in accordance with the above specifications is applicable only when in unswitched mode.

C. TIE Line Channels

1. **Type 2021** - A two-wire or four-wire interface with four-wire facilities furnished for tie-line use between PBX’s.

2. **Type 2025** - A two-wire or four-wire interface with four-wire facilities furnished for tie-line use between a PBX and a C.O. Centrex.

3. **Type 2026** - Furnished for tie-line use between C.O. Centrexes.

4. Regulations applicable to Types 2021, 2025, and 2026 Channels

   1. Type 2025 tie line channels between C.O. Centrex switching systems and non-C.O. Centrex switching systems are subject to one transmission function charge and one local channel charge at the non-C.O. Centrex end.

   2. For Type 2026 channels connecting switching systems located in different central office serving areas, one interoffice channel is required to connect the wire centers. In addition, a transmission function is required at each end of the interoffice channel to make the channel operative.

   3. For Type 2026 channels connecting switching systems located in different exchange areas, one interexchange channel is required to connect the wire centers. In addition, a transmission function is required at each end of the interexchange channel to make the channel operative.

   4. A Signaling Arrangement is provided for tie lines connected to grandfathered PBXs in accordance with Part 68 of the F.C.C. Rules and Regulations under the
following conditions:

(C) Indicates Change

Issued: December 13, 1985  Effective: January 1, 1986
INTERCOMPANY PRIVATE LINE SERVICE

1) An E & M Signaling Arrangement is required for each tie line termination, operating in a Dial Repeating mode, at a customer premises with a Registered PBX.

2) An E & M Signaling Arrangement is required for each tie line termination of a customer premises with customer-provided PBXs when the tie-line is arranged with an E & M signaling interface.

3) An E & M Signaling Arrangement is not required with Type 2021 or Type 2025 channels for additions to or for new installations of customer provided PBX equipment when not arranged with an E & M signaling interface.

D. Telephone Answering Service Channels

1. Type 2040 - A two-wire interface with effective two-wire facilities engineered for a 1000 Hz loss objective of 0 to 8 db; normally suitable for Telephone Answering Service use for secretarial lines connected directly to Telephone Answering Service Equipment.

   a. Regulations applicable to Type 2040 Channels

   1) When the secretarial line is connected directly to Telephone Answering Service Equipment in the same exchange, one local channel measured in one-quarter (1/4) airline mile increments from the patron’s serving wire center to the location of the Telephone Answering Service Equipment is provided. When the secretarial line is connected directly to Telephone Answering Service Equipment not on the same premises, one transmission function is also required.

   2) When the secretarial service is furnished from an exchange other than the one in which the Telephone Answering Service is located, one interexchange channel is required to connect the wire centers. One local channel and one transmission function are required to connect the interexchange channel to the premises.
2. **Type 2041** - A two-wire interface with effective two-wire facilities engineered for a 1000 Hz loss objective of 0 to 4 db; normally suitable for Telephone Answering Service use for secretarial lines terminated in concentrator equipment.

(C) Indicates Change

Issued: December 13, 1985  Effective: January 1, 1986
INTERCOMPANY PRIVATE LINE SERVICE

1. Regulations applicable to Type 2041 Channels

1) When a secretarial line is connected to a concentrator located in the same central office serving area as the patron’s normal central office servicing area, the connection is provided at a flat rate and requires no measurement.

2) When a secretarial line is connected to a concentrator located in a different central office serving area from the patron’s normal central office serving area, one interoffice channel is required to connect the wire centers. A transmission function is required at each end of the interoffice channel to make the channel operative.

3) When a secretarial line is connected to a concentrator located in a different exchange from the patron’s normal exchange, one interexchange channel is required to connect the wire centers. A transmission function is required at each end of the interexchange channel to make the channel operative.

3. Type 2043 - A two-wire interface with effective two-wire facilities engineered for a 1000 Hz loss objective of 0 to 4 db; normally suitable for Telephone Answering Service concentrator-identifier use between a concentrator unit located at either the Telephone Company or the Telephone Answering Service premises and an identifier unit located at the Telephone Answering Service premises.

1. Regulations applicable to Type 2043 Channels

1) When the concentrator is located in a Telephone Company central office, one local channel and one transmission function, Type 2043, are required for each talking path connected to the identifier at the Telephone Answering Service premises. If the central office serving area where the concentrator is located is different from the Telephone Answering Service central office serving area, one interoffice channel for each talking
path is also required to connect the wire centers.

2) When the concentrator is located in a different exchange area from the identifier, an interexchange channel is required to connect the wire centers. One local channel and one transmission function are required to connect the interexchange channel to the Telephone Answering Service premises.

(C) Indicates Change

Issued: December 13, 1985  Effective: January 1, 1986
INTERCOMPANY PRIVATE LINE SERVICE

3) When the concentrator is located at a Telephone Answering Service premises, for each talking path one local channel and one transmission function, Type 2043, are required to connect the serving central office to the premises where the concentrator is located and one local channel and one transmission function, Type 2043, are required to connect the serving central office to the premises where the identifier is located. If the central office serving areas for the two premises are different, one interoffice channel for each talking path is required to connect the wire centers.

4) When a customer-provided concentrator is located on a premises in a different exchange from the customer-provided identifier, one interexchange channel is required to connect the wire centers. One local channel and one transmission function are required to connect the interexchange channel to the premises where the concentrator is located and one local channel and one transmission function are required to connect the interexchange channel to the premises where the identifier is located.

E. Rate Schedules

1. Channels on the same or connected premises
   Type 2021
   Each Two-Wire Channel $2.00
   Each Four-Wire Channel $4.00

2. Channels between adjacent premises
   Type 2021
   Each Two-Wire Channel $8.50
   Each Four-Wire Channel $17.00

3. Intraexchange and Interexchange Channels
   a. Local channel - one required for each
premise at which a channel terminates

Each Two-Wire Channel
$21.00

Each Four-Wire Channel
$42.00

5. Automatic Signaling

Private Line Signaling
Automatic Ringing, each.........................$3.96

6. E & M Signaling

E & M Signaling arrangement, for Type 2021 and Type 2025 Channel, each.................................$17.00

7. Multi-Point Channels

For bridging multi-point Type 2001 and Type 2002 Channels
At each premise at which a channel terminates.........................$19.50

8. Conditioning

a. Type C1

1) On a two-point channel not arranged for switching
   - each station.........................$ 6.00
INTERCOMPANY PRIVATE LINE SERVICE

2) On a multi-point channel not arranged for switching
   -for the first station in an exchange ..................$11.50
   -for each additional station in the same exchange as the first station ...............$8.00

b. Type C2

1) On a two-point channel not arranged for switching
   -each station ......................$22.00

2) On a multi-point channel not arranged for switching
   -for the first station in an exchange ..................$32.00
   -for each additional station in the same exchange as the first station ...............$11.50

IV. Series 3000 Channels

A. Type 3001 - A two-wire interface with effective two-wire facilities or a four-wire interface with four-wire facilities engineered for a 1000 Hz loss objective of 16db; for two-point or multi-point service; normally suitable for half-duplex or full-duplex operation for remote metering, supervisory control and miscellaneous signaling.

1. Regulations applicable to Type 3001 channels

   1. When these channels are furnished for multipoint service, a bridging charge applies for each premises bridged on the same circuit, in addition to all other applicable charges for the channels

   2. For duplex service on the same or connected premises or to adjacent premises, the monthly rates for two channels apply.

   3. For duplex intraexchange and interexchange service the monthly rates for two local channels for each premises served, apply.

   4. The equipment and associated station wiring shall be provided by the customer.
(C) Indicates Change

Issued: December 13, 1985                Effective: January 1, 1986
5. The use of customer-owned equipment is subject to the regulations set forth in this Tariff regarding connections with customer-owned equipment. However, the customer, by the use of his own equipment, may create additional channels or may transmit more than one tone or signal in sequency or simultaneously to the extent permitted by the normal transmission characteristics of the grade of channel furnished.

6. Customers, by use of their own equipment, and to the extent permitted by the normal transmission characteristics of the grade of channel ordered may create additional channels for any type of communication by subdividing a channel furnished under this Tariff. The Telephone Company makes no representation as to the suitability of the channels provided by it for such sub-division into additional channels by the customer. These channels may be connected with other channels which are furnished by the Telephone Company to the same customer, and to channels created therefrom, if the forms of electrical communication for which they are being used are compatible.

B. Type 3002 - A two-wire interface with effective two-wire facilities or a four-wire interface with four-wire facilities engineered for a 1000 Hz loss objective of 16db; for two-point or multi-point service; normally suitable for half or full duplex data transmission.

1. Regulations applicable to Type 3002 channels

   1. Data processing equipment, teletypewriter station equipment and terminal equipment required to condition signals generated by or delivered to customer apparatus, and station wiring for data transmission purposes shall be provided by the customer, subject to the regulations set forth in this Tariff regarding connections with customer-owned equipment.

   2. Customers, by use of their own equipment, and to the extent permitted by the normal transmission
characteristics of the grade of channel ordered may create additional channels for any type of communication by subdividing a channel furnished under this Tariff. The Telephone Company makes no representation as to the suitability of the channels by the customer. These channels may be connected with other channels which are furnished by the Telephone Company to the same customer, and to channels created therefrom, if the forms of electrical communication for which they are being used are the same.

(C) Indicates Change

Issued: December 13, 1985
Effective: January 1, 1986
3. When these channels are furnished for multi-point service, a bridging charge applies for each station bridged on the same circuit.

2. Conditioning applicable to Type 3002 Channel

a. Type C1- For a two-point or multipoint channel the envelope delay distortion shall not exceed:

   - between 1000 and 2400 Hertz, a maximum difference of 1000 micro-seconds

   The loss deviation with frequency (from 1000 Hertz reference) shall not exceed:

   - between 1000 and 2400 Hertz, -1db to +3db
   - between 300 and 2700 Hertz, -2db to +6db
   - between 2700 and 3000 Hertz, -3db to +12db
   (+ means more loss)

b. Type C2- For a two-point or multipoint channel the envelope delay distortion shall not exceed:

   - between 1000 and 2600 Hertz, a maximum difference of 500 micro-seconds
   - between 600 and 2600 Hertz, a maximum difference of 1500 micro-seconds
   - between 500 and 2800 Hertz, a maximum difference of 3000 micro-seconds

   The loss deviation with frequency (from 1000 Hertz reference) shall not exceed:

   - between 500 and 2800 Hertz, -1db to +3db
   - between 300 and 3000 Hertz, -2db to +6db
   (+ means more loss)

   NOTE: On a multipoint channel arranged for switching, conditioning in accordance with the above specifications is applicable only when in the unswitched mode.

  c. Type C4- For a two-point, three-point or four-point channel the envelope delay distortion
shall not exceed:

- between 100 and 2600 Hertz, a maximum difference of 300 micro-seconds
- between 800 and 2800 Hertz, a maximum difference of 500 micro-seconds
- between 600 and 3000 Hertz, a maximum difference of 1500 micro-seconds
- between 500 and 3000 Hertz, a maximum difference of 3000 micro-seconds

(C) Indicates Change

Issued: December 13, 1985 Effective: January 1, 1986
the loss deviation with frequency (from 1000 Hertz reference) shall not exceed:

- between 500 and 3000 Hertz, -2db to +3db  
- between 300 and 3200 Hertz, -2db to +6db  (+ means more loss)

NOTE: On a three-point or four-point channel, conditioning in accordance with the above specifications is applicable only between one exchange (that designated by the customer as the control point) and each of the other two or three exchanges.

d. Type D1- For a two-point channel not arranged for switching

- Certain data transmission characteristics necessary for high performance data transmission cannot be assured on all channels generally available for data transmission. However, Type 3002 voice grade two-point channels may be specially arranged to provide for the following technical parameters at the request of the customer:

- Signal to C-Notched Noise Ratio 28db
- Nonlinear distortion:
  (1) signal to second order distortion 35db
  (2) signal to third order distortion 40db

When the channel equipped with this conditioning is utilized for voice communications, the Telephone Company does not undertake to represent that channel will be suitable for such voice transmission.

C. Rate Schedule

CONSTRUCTION AND ATTACHMENT CHARGES

GENERAL

The rates otherwise provided for in this tariff are based on furnishing service immediately adjacent to existing lines and facilities of the Telephone Company and on the use of lines and facilities engineered and constructed according to common and accepted practices. When service is desired at points somewhat removed from existing lines and facilities, or when abnormal and unusual arrangements and installations are desired, such service and installations are subject to additional charges as prescribed hereunder.

CONSTRUCTION ON PUBLIC RIGHT-OF-WAY

In all cases of plant construction on public highway, ownership of the plant must be vested in either the Telephone Company or some company with which the Telephone Company has a joint use agreement.

When local exchange service is desired at a point outside the base rate area but within the exchange area more than 1,320 feet distant from then existing facilities, the applicant therefor may be required to pay for this construction or the use of another company’s plant in lieu of such construction as follows:

For each 100 feet, or fraction thereof, required to make the necessary extension beyond the first 1,320 feet, route measurement, from the existing lines, a charge of $10.00.

Measurement to be restricted to the shortest and most direct route over which the desired point can be reached by following public right-of-way or other vested right-of-way privileges which the Telephone Company may hold by reason of its franchise or charter, including public thoroughfares such as highways, streets and public alleys.

CONSTRUCTION ON PRIVATE PROPERTY

In all cases of plant construction on private property, where the type of construction is selected by the Telephone Company, the Telephone Company will construct, own, and maintain the facilities, either wholly or jointly with an electric utility, subject to a construction charge based on route measurements as follows:

First 500 feet of construction - No charge.
Each additional 100 feet or fraction thereof - $10.00

Issued: July 1, 1976       Effective: September 15, 1976
CONSTRUCTION ON PRIVATE PROPERTY (continued)
Where the customer requests a type of construction different from that selected by the Telephone Company, a charge will be made to cover this excess cost of construction above that selected by the telephone company.

The Telephone Company shall have access to all facilities at all times for maintenance purposes.

Where an applicant is so located that it is necessary to use a private right-of-way to furnish service, the subscriber is required to pay the entire cost involved in securing such right-of-way.

OTHER SPECIAL CONSTRUCTION
When some special or abnormal installation or arrangement of facilities is desired, such as underground construction or concealed wiring, the applicant may be required to furnish at his own expense all necessary conduits, outlets and other fixtures. The Telephone Company will install and maintain its facilities in such conduits and fixtures, provided they are constructed in such a manner as to meet the Telephone Company’s needs and approval.

MINIMUM CONTRACT
New construction will be provided only where service is contracted for a minimum period of one year.

REFUNDS
If at any time within three years from date of completed construction, pole lines for which a subscriber has paid a non-recurring charge are used for other purposes, such subscribers may be entitled to refunds as follows, provided they are still served by such construction:

If such lines are used to carry toll lines of the Telephone Company, the refund will be prorated to cover the unexpired portion of the original three year period for that part of the pole line so used.

When such lines are used to supply local exchange service to other subscribers, the refund will be the difference between the original charge and that subscriber’s pro rata share of the total construction, allowing 1,320 feet for each main station for that pole line.
UNDERGROUND SERVICE IN RESIDENTIAL DEVELOPMENTS

All Telephone service shall be placed underground in residential developments of 5 or more adjoining lots in a recorded plan for the construction of single-family residences (detached or otherwise) including mobile homes intended for year-around occupancy, or one or more adjoining lots for the construction of one or more apartment houses containing an aggregate of five or more family units, if telephone service to such residential or apartment house lots necessitates extending the company’s existing distribution lines.

A. A developer shall:

(1) At his own cost, provide the company with easements satisfactory to the company for occupancy and maintenance of distribution and service lines and related facilities except in public ways which the company has the legal right to occupy.

(2) At his own cost, clear the ground in which the aforesaid line and related facilities are to be laid, of trees, stumps and other obstructions, and provide trench for such lines according to telephone company specifications, and backfill within six inches of final grade or pay such related costs that may be incurred to include telephone lines in a common trench with other utility services.

(3) Request the installation of distribution and service lines at such time that the lines may be installed before curbs, pavements and sidewalks are laid; keep the route of lines clear of machinery and other obstructions when the line installation crew is scheduled to appear; and otherwise cooperate with the company to avoid unnecessary costs.

(4) Place with the telephone company, in advance or upon such other terms as the company may require, the following charges:

(a) A prepayment in aid of construction in an amount not in excess of 60% of the company’s costs of the distribution cable for the development.

(b) Such prepayment in aid of construction will be refunded on a proportionate basis for each contract for telephone service received. The basis of total refund shall be 100 percent refund upon receipt of telephone contracts for telephone service from 50 percent of the total development within a ten-year period.
CONSTRUCTION AND ATTACHMENT CHARGES (cont’d)

UNDERGROUND SERVICE IN RESIDENTIAL DEVELOPMENTS (cont’d)

B. If the developer fails to comply with Paragraph A(2) or (3) or changes the plot plan after installation of the telephone company’s lines has begun, or otherwise necessitates additional costs by his act or failure to act, such additional costs shall be borne by the developer or his agent.

C. All distribution and service lines, except pedestals, installed within a development shall be installed underground; shall conform to the company’s construction standards; and shall be owned and maintained by the company. Such installations shall be performed by the company or by such other entity as the company may authorize to do the work. The company shall not be liable for injury or damage occasioned by the wilful or negligent excavation, breakage or other interference with its underground lines by other than its own employees or agents.

TAXES ON CONTRIBUTIONS IN AID OF CONSTRUCTION AND CUSTOMER ADVANCES (C)

Any contribution in aid of construction (CIAC), customer advance or other like amounts received from the customer which shall constitute taxable income as defined by the Internal Revenue Service will have the income taxes segregated in a deferred account for inclusion in rate base in a future rate case proceeding. Such income taxes associated with a CIAC or customer advance will not be charged to the specific contributor of the capital.

(C) Indicates Change

Issued: December 19, 1989 Effective: February 16, 1990
MISCELLANEOUS SERVICE AND EQUIPMENT

DIRECTORY LISTINGS
All subscribers, including pay telephones, are entitled to one listing (C) in the official directory published by the Telephone Company.

Additional listings are provided at $.25 per month, subject to a minimum charge of $1.00 for each directory issue.

Acceptable listings are limited to the real names of individuals, partnerships, or corporations and/or names under which such individuals, partnerships or corporations actually conduct their business.

SIGNaling EQUIPMENT ##
Monthly recurring charges for extension bells and gongs are as follows:

- Extension bell.............................................   $.25
- Extension gong.............................................   $.50

EXTENSION STATIONS
Rates for extension stations are filed in Section 2 of this tariff. Extension stations will be provided where operating limitations permit, but will be limited to four extension stations per one-party line, and one extension station per subscriber on four-party lines.

SPECIAL CORDS ##
The rates established in this tariff are for instruments equipped with cords six feet in length. Longer cords and retractable receiver cords will be installed by the Telephone Company, where conditions warrant their use for a flat charge to cover the cost of such cord plus an installation charge as shown in Section 3. The subscriber will be required to pay for replacement of the cord if it becomes unsatisfactory for service.

COLored TELEPHONES ##
Colors telephones will be furnished at a monthly charge of $.20 plus appropriate service connection charge.

Colored are limited to those normally available from the company’s regular supplier of telephone instruments.

## These rates are applicable only to customers with services at December 31, 1982 or to customers taking service after that date utilizing embedded equipment.

(C) Indicates Change
MISCELLANEOUS SERVICE AND EQUIPMENT (cont’d)

ILLUMINATED DIAL, NIGHT LIGHT TELEPHONES ##
A small telephone in color equipped with illuminated dial and night light, with or without an external bell, will be furnished at the following rates, plus appropriate service connection charges:

- Monthly Charge with Bell............... $ .75
- Monthly Charge without Bell.......... $ .50

NON-PUBLISHED NUMBERS
A telephone number is "non-published" when it is omitted from the directory and also from the information lists of the Telephone Company. Upon request, and at a rate of $.50 per month, a subscriber may have a "non-published" number, but such requests are discouraged as far as possible, and the subscriber is required to sign a written statement releasing the Telephone Company from all responsibility for losses arising from such arrangement. Unless the specific call number is given by the person calling, connection will not be established with a telephone having a "non-published" number.

This charge does not apply if the subscriber has another telephone line at the same location which is listed in the directory and information lists.

When existing service for the same customer requires a number change in order to establish or continue non-published service a charge as shown in Section 3 applies.

Pay Telephones will not be charged for a non-published telephone number. (C)

SUSPENSION OF SERVICE AT SUBSCRIBER’S REQUEST
Upon request from a residence subscriber service will be suspended for a period of not less than one month nor longer than five months in a period of any consecutive twelve months, for a charge equivalent to one-half the rate for local service, equipment, mileage and listings. The telephone company accepts no responsibility to intercept calls and provide information on inward calls.

## These rates are applicable only to customers with services at December 31, 1982 or to customers taking service after that date utilizing embedded equipment.

(C) Indicates Change

Issued: March 18, 1997          Effective: April 15, 1997
SALE OF COMPANY-OWNED EMBEDDED TERMINAL EQUIPMENT

A. GENERAL

The Company may offer for sale any Company-owned embedded terminal equipment which may meet the requirements for customer-provided and connected terminal equipment specified in Part 68 of the Federal Communications Commission’s Rules and Regulations, in other sections of this tariff, and as authorized by the Pennsylvania Public Utility Commission.

B. Customer provided terminal equipment obtained through the purchase of Company-owned equipment shall be subject to all provisions contained in other sections of this tariff relating to customer-provided equipment and to the rules and regulations of Pennsylvania Public Utility Commission and in accordance with Part 68 of the Federal Communications Commission’s Rules and Regulations.

Regulations in this section are in addition to all other applicable regulations identified in other sections of this tariff.

Payment of the applicable sales charges for simple embedded terminal equipment purchased in place or from inventory may be made by cash, money order or check.

Embedded equipment sold by the Telephone Company, other than that offered for purchase in place, is available for inspection and sale, only at the Company Business Office.

C. TITLE

Title to the embedded terminal equipment purchased and all responsibilities of ownership, including risk of loss, maintenance, or other liabilities, shall pass to the purchaser upon the date that the agreement to purchase is made. Purchased terminal equipment includes the station wiring or cord between the terminal equipment and the connecting block or jack, but does not include the connecting block or jack.

D. WARRANTY

Maintenance or replacement of in-place embedded terminal equipment sold will be covered by a 30-day warranty. Maintenance or replacement of embedded terminal equipment sold from inventory will be covered by a 90 day warranty. All necessary parts and labor will be provided during the 30 or 90 day warranty periods without any additional charges to the owner. The warranty will not apply to

The Company may offer for sale certain items at prices less than the price set forth in the effective tariff. These prices will be above salvage and will only apply to telephones that have been cosmetically damaged or used as display models.

Customers purchasing in-place sets, or sets from Company inventory for a new connection, may pay for such purchase over a three-month period. Payment may be made by check, money-order or cash.

F. SALE OR MODIFICATION OF EQUIPMENT FOR PARTY LINE SERVICE

The company will sell in-place terminal equipment to existing party line customers which will provide adequate service. If existing party line customers purchase other than in-place terminal equipment the Company will make modifications as required to make such purchased equipment compatible with party line service. The customer will be notified if it is impossible to modify the equipment.

Terminal equipment to be modified for party line service must meet the following basic requirements:

1. Interchangeable ringer with connectorized line leads.
2. A line cord with three or more conductors.
3. A removable housing accompanied by a wiring conversion diagram.

If these basic requirements are not met, the Company will not undertake modification.

The cost of modification will be $10.00 plus time and material.

If purchased or leased party-line equipment that is compatible with telephone company facilities, requires further modification because of any new arrangements of facilities by the telephone company, the telephone company is responsible for such modification.

Party line customer may not use automatic answering devices which answer any ring on the line, nor automatic dialers which seize the line externally from the telephone.

DIRECTORY ASSISTANCE SERVICE

1. General
Directory Assistance Service is furnished upon customer request for assistance in determining telephone numbers. The regulations and rates set forth below apply when customers of this company request assistance in determining telephone numbers with the same Numbering Plan Area designation, which are requested from the Pennsylvania Directory Assistance attendant in the originating Numbering Plan Area.

2. Regulations
   a. Monthly Call Allowance
      An allowance of two direct dialed Directory Assistance calls per month without charge is permitted for each: residence exchange service line, residence dormitory line and residence trunk line. Call allowances or calls are not transferable between separate accounts of the same customer.

   b. Exemptions
      Charges for Directory Assistance Service are not applicable to the following types of calls of Directory Assistance:

         1. Calls from patients in hospitals, skilled nursing homes and convalescent homes which have been properly licensed by the Commonwealth of Pennsylvania and which have as their predominant undertaking the surgical, medical and nursing care of the sick and disabled.

         2. Calls placed from residence telephones where a member of the customer's household has been certified by a registered physician or a designated agency as unable to use a directory because of a visual or physical handicap, or for the business telephone of a certified handicapped customer where assistance is otherwise not available.

   c. Multiple Number Request
      A maximum of two requested telephone numbers per call are permitted.

3. Rates
   Per Call
   a. Where the customer direct dials Directory Assistance.................................$ .50 (I)
   b. Where the customer places a call to the Directory Assistance attendant via a Telephone Company Operator.................................$ .50* (I)
   c. Where the customer direct dials Directory Assistance from a Pay Telephone.........................$ .50 (I)
   d. Where the customer originates a Directory Assistance call from a Pay Telephone via a Telephone Company Operator.........................$ .50* (I)

*Plus the applicable operator handled rate.

MISCELLANEOUS SERVICE AND EQUIPMENT

OPERATOR SERVICES

A. LINE STATUS VERIFICATION

Upon customer request the operator will verify and provide the line status condition subject to a charge of $.70 for each request.

No charge will apply for a line status verification when a trouble condition is indicated on the line.

B. CALL INTERRUPTION

Upon customer request the operator will verify the line status condition and interrupt a call in progress to notify the party on the call that another caller is attempting to contact the line. The charge for call interruption is $1.10 for each request. This charge includes the line status verification and call interruption.

* * * * *(C)

D. OPERATOR CALLS

Calls placed through the operator to a station in the same Local Calling Area, are charged at the following rates:

MISCELLANEOUS SERVICE AND EQUIPMENT

PENNSYLVANIA TELECOMMUNICATIONS RELAY SERVICE

1. GENERAL
The Pennsylvania Telecommunications Relay Service is a Relay telecommunication service for the deaf, hearing and/or speech disabled population of the Commonwealth. The service permits telephone communications between deaf, hearing, and/or speech disabled individuals who must use a Text Telephone and individuals with normal hearing and speech as provided in the tariff filed by AT&T Communications of Pennsylvania, Inc.

2. SURCHARGE
In addition to the charges provided in this tariff and other intrastate toll tariffs in which this Company concurs, a surcharge will apply to all residence and business access lines served by this Company. This surcharge applies regardless of whether or not the access line uses the Pennsylvania Telecommunications Relay Service.

This surcharge serves as the funding vehicle for the operation of the Pennsylvania Telecommunications Relay Service, and shall be calculated by the Pennsylvania Public Utility Commission (the Commission). The Commission shall compute the Pennsylvania Telecommunications Relay Service Surcharge each year and notify local exchange carriers of the surcharge amount to be applied for the twelve month period commencing with July 1 of each year.

The Commission may revise the surcharge more frequently than annually at its discretion.

Tariff revisions will be filed whenever the Commission calculates a new surcharge amount and notifies the Company.

The following surcharge rates apply to all bills issued on or after July 1, 2008:

- Per residence access line, per month $0.08
- Per business access line, per month $0.08

Centrex lines will be charged on an equivalency basis as determined by the Commission.

(C) Indicates Change (D) Indicates Decrease

Issued: June 30, 2008 Effective: July 1, 2008
3. Rates

Local calls will be charged at the applicable local flat rate or local measured service rate. Local calls originating from pay telephones shall be completed free of charge. All intraLATA toll calls, placed through the Pennsylvania Telecommunications Relay Service, will be rated according to the Rates Applicable on Messages Placed By Certified Speech and/or Hearing Disabled in the Pennsylvania Telephone Association Toll Tariff Pa. P.U.C. No. 10. This Company concurs in this tariff.

The company will make available to the Telecommunications Relay Service (TRS) user a calling card. The rates for the calling card shall not exceed those that would apply to identical calls for non-TRS users of coin sent-paid service.

Please refer to the appropriate Interexchange Carrier tariff for interstate charges.

Issued: March 18, 1997
Effective: April 15, 1997
PROVISIONS FOR CALLER ID

Caller ID is an optional feature which allows a subscriber to see the telephone number of an incoming call displayed on the customer provided display unit. The Telephone number of an incoming call will display between the first and second rings. Caller ID Service works only on calls that originate from and terminate in central offices that are equipped and have SS7 connectivity. Caller ID is available to customers by monthly subscription only, which provides unlimited use of this service.

As facilities permit, Caller ID Service will be provided to the following customers: Residence and Business One-Party Service and PBX Trunks. For calls originating from a line within a PBX Multi-Line hunting group, only the main telephone number will be delivered.

The telephone numbers that will be displayed on a Caller ID subscriber display unit include listed, non-listed and non-published telephone numbers. Telephone numbers that will not be displayed to the Caller ID subscriber are (1) calls from customers who use Per-Call Blocking or subscribe to Per Line Blocking; (2) calls from customers located in central offices not a part of the SS7 Signaling System; and (3) called placed through an operator. When these types of calls are received by a Caller ID subscriber, their display unit will notify them that the calling telephone number is unavailable.

In addition to the ability to see the telephone number of incoming calls, Caller ID Service provides a subscriber with the ability to reject calls from customers who have blocked the display of the telephone number on outgoing calls. This feature is called Anonymous Call Rejection (ACR) and can be activated by dialing *77 (tone) or 1177 (rotary) and deactivated by dialing *87 (tone) or 1187 (rotary). This feature is initially provided to the subscriber in the deactivated mode. The ACR will remain either on or off until the subscriber makes a change by dialing the special code. The Caller ID subscriber will hear a confirmation tone when the feature is activated or deactivated. When a caller who has activated the Per-Call Blocking or Per-Line Blocking, calls a Caller ID subscriber that has activated the ACR, the caller will hear an announcement that calls from blocked telephone numbers are not being accepted. The Caller ID subscriber’s telephone does not ring. There is no additional charge for this feature. Blocked local or long distance calls routed to the Anonymous Call Rejection announcement will not be rated as completed calls.
MISCELLANEOUS SERVICE AND EQUIPMENT (cont’d)

PROVISIONS FOR DELUXE CALLER ID

Deluxe Caller ID is an enhancement of the optional feature Caller ID Service. Deluxe Caller ID allows a subscriber to see the telephone number and name of an incoming call displayed on the customer provided display unit. The telephone number and name of an incoming call will display between the first and second rings. Deluxe Caller ID works only on calls which originate from and terminate in central offices that are equipped for this service or between central offices that are equipped and have SS7 connectivity. Deluxe Caller ID is available to customers by monthly subscription only, which provides unlimited use of this service.

As Facilities permit, Deluxe Caller ID Service will be provided to the following customers: Residence and Business One-Party Service and PBX Trunks.

The telephone numbers that will be displayed on a Deluxe Caller ID subscriber display unit include listed, non-listed and non-published telephone numbers. Telephone numbers that will not be displayed to the Deluxe Caller ID subscriber are (1) calls from customers who use Per-Call Blocking or subscribe to Per Line Blocking; (2) calls from customers located in central offices not a part of the SS7 Signaling System; and (3) called placed through an operator. When these types of calls are received by a Caller ID subscriber, their display unit will notify them that the calling telephone number is unavailable.

In addition to the ability to see the telephone number of incoming calls, Deluxe Caller ID Service provides a subscriber with the ability to reject calls from customers who have blocked the display of their telephone number and name on outgoing calls. This feature is called Anonymous Call Rejection (ACR) and can be activated by dialing *77 (tone) or 1177 (rotary) and deactivated by dialing *87 (tone) or 1187 (rotary). This feature is initially provided to the subscriber in the deactivated mode. The ACR will remain either on or off until the subscriber makes a change by dialing the special code. The Deluxe Caller ID subscriber will hear a confirmation tone when the feature is activated or deactivated. When a caller who has activated the Per-Call Blocking or Per-Line Blocking, calls a Deluxe Caller ID subscriber that has activated the ACR, the caller will hear an announcement that calls from blocked telephone numbers are not being accepted. The Deluxe Caller ID subscriber’s telephone does not ring. There is no additional charge for this feature. Blocked local or long distance calls routed to the Anonymous Call Rejection announcement will not be rated as completed calls.
CALLER ID PER-CALL BLOCKING

Per-Call Blocking is automatically available to all customers served by the Company. This blocking option allows the calling party to block the passage of their telephone number and name on outgoing calls. To activate Per-Call Blocking a special code is dialed prior to placing each call. When this blocking feature is activated by the calling party, and they place a call to a Caller ID or Deluxe Caller ID subscriber, the subscriber’s display unit will indicate that an incoming call has been blocked. There is no charge to activate Per-Call Blocking and the service is provided on an unlimited basis. Caller ID Per-Call Blocking does not prevent the delivery of telephone numbers to 911 emergency service providers. The public, semi-public and COCOT telephones in the Company’s serving area will only be equipped with Caller ID Per-Call Blocking option. Instructions on how to use blocking will be proved to each public telephone location.

CALLER ID PER-LINE BLOCKING

The calling party may prevent the display of their telephone number and name on a permanent basis by subscribing to Per-Line Blocking. This blocking option automatically prevents the display of the calling number and name of all calls placed from that line to Caller ID subscriber, unless the feature is deactivated. If a subscriber of Per-Line Blocking chooses to deactivate blocking, the calling telephone number and name would be sent for that call only. After the call is completed, the line automatically reverts back to the Per-Line Blocking feature. The deactivation of Per-Line Blocking is competed by dialing a special code prior to placing each call.

The Code to deactivate Per-Line Blocking is the same as the one used to activate Per-Call Blocking. Caller ID Per-Line Blocking will be available to all customers in the Company’s serving area.

The per-Line Blocking can only be added or removed from a customer’s line by placing a service order with the Company. When this service is removed the line is automatically converted to the Per-Call Blocking capability. Caller ID Per-Line Blocking does not prevent the delivery of telephone numbers to 911 emergency service providers.
MISCELLANEOUS SERVICE AND EQUIPMENT (cont’d)

CALLER ID PER-LINE BLOCKING (cont’d)

Customers who use either Per-Call Blocking or Per-Line Blocking will be unable to complete calls to Caller ID and Deluxe Caller ID subscribers that have activated the Anonymous Call Rejection (ACR) feature. When a caller who has blocked the display of his/her number and name calls a Caller ID or Deluxe Caller ID subscriber that has activated the ACR, the caller will hear an announcement that the called party does not take anonymous calls. To complete a call to a Caller ID or Deluxe Caller ID subscriber that has activated ACR: (1) place the call by unblocking the telephone number, or (2) place the call through an operator which may involve charges in addition to the cost of the call. The live operator surcharge will be waived for customers of Pennsylvania Telephone Company who are victims of domestic violence, the staffs of domestic violence program agencies (when involved in domestic violence counseling) and emergency services personnel (while in the performance of their jobs). If the operator surcharge can’t be waived when the call is being placed, the Company will, upon notification, credit the live operator surcharge amount to the aforementioned party’s telephone bill. Furthermore, should alternative methods become available in the future which permit the aforementioned access the ACR party without revealing the caller’s telephone number, the Company will waive any additional charges associated with such alternate methods.

INTEGRATED SERVICES DIGITAL NETWORK (ISDN)

PRI SERVICE

A. GENERAL

PRI is an optional service arrangement for local exchange access based on the Primary Rate Interface (PRI) arrangement of the Integrated Services Digital Network (ISDN). PRI is a high capacity access path for communications providing voice or data transmission over the Telephone Company exchange network.

B. REGULATIONS

1. Explanation of Terms

Circuit Switching

A switching technique in which an entire circuit or, in a digital switch equipped for ISDN, a specific selection of time slots is dedicated to a given call.

Primary Rate Interface (PRI)

PRI is an alternative for individual local exchange access loop services such as Direct Inward Dialing (DID), Direct Outward Dialing (DOD), Wide Area Telecommunications Service (WATS), Toll Free Service and business dial tone lines. PRI is provisioned on the 1.544 megabit per second (mbps) bandwidth and uses the Integrated Services Digital Network (ISDN) architecture of 23 B channels and one D channel or 24 B channels to provide the customer with the capabilities of simultaneous access, transmission and switching of voice, data and imaging services via channelized transport. In addition, PRI provides the customer with the service capabilities and features described in Sections B.3. and B.5 following.

Integrated Services Digital Network

Integrated Services Digital Network (ISDN) describes the end-to-digital telecommunications network architecture, which provides for the simultaneous access, transmission and switching of voice, data and imaging services. These functions are provided via channelized transport facilities over a limited number of standard user-network interfaces. The ISDN architecture consists of digital switching systems, which connect Primary Rate Interface lines to their serving central office.
INTEGRATED SERVICES DIGITAL NETWORK (ISDN) (Cont’d)

PRI SERVICE (Cont’d)

B. REGULATIONS (Cont’d)

1. Explanation of Terms (Cont’d)

Network Interfaces

ISDN Primary Rate Interface is comprised of a limited set of standard user-network interfaces. The PRI customer premises equipment (CPE) located at the customer premises must be compatible with the network interface. This network interface is defined as follows: Physically, the network interface is a metallic four-wire telephone loop interface between a switch equipped with ISDN and the network termination 2 (NT2). The NT2 is customer premises equipment required for providing physical compatibility in terminating telephone facilities at the customer premises.

Optional Service Features Package

The Optional Service Feature Package incorporates the optional features Calling Line Identification and Call-by-Call Service Selection.

PRI Line Group

A PRI Line Group is a group of channels, which are designated as one of the following:

Incoming Business Dial Tone Line Group
Outgoing Business Dial Tone Line Group
Two-way Business Dial Tone Line Group
WATS Line Group
Line Group
Call-by-Call Service Selection Line Group

(C) Indicates Change

Issued October 4, 1999 Effective: December 3, 1999
INTEGRATED SERVICES DIGITAL NETWORK (ISDN) (Cont’d)

PRI SERVICE (Cont’d)

B. REGULATIONS (Cont’d)

1. Explanation of Terms (Cont’d)

PRI Line Group (Cont’d)

Only one Call-by-Call line group may be provisioned on a PRI Arrangement. Where available, up to two of the other line group types may be provisioned on a PRI Arrangement. The total number of line groups per PRI Arrangement is limited to four. The capability to assign other than Call-by-Call line groups varies by central office switch type.

Primary Rate Access Facility

The Primary Rate Access Facility provides a high capacity access path at a transmission speed of 1.544 megabits per second (mbps) for communications between the customer’s premises and his/her serving central office. Each Primary Rate Access Facility supports one PRI Arrangement.

Primary Rate Interface Arrangement

PRI Arrangement is a service providing ISDN capabilities between the customer premises and the serving central office. The PRI Arrangement consists of 23 “B” channels and one “D” channel or 24 “B” channels which are defined as follows:

B Channel

The B channel is a 64 kilobit per second (kbps) channel used for information transfer between users. The B channel may be used in conjunction with circuit-switched service.

D Channel

The D channel is a 64 kilobit per second (kbps) channel that carries signaling and control for the B channels.
INTEGRATED SERVICES DIGITAL NETWORK (ISDN) (Cont’d)

PRI SERVICE (Cont’d)

B. REGULATIONS (Cont’d)

1. Explanation of Terms (Cont’d)

Software Defined Lines

Software defined lines are lines which are provisioned on the Primary Rate Access Facility by establishing their identity in central office translations. These lines physically ride on the 4-wire ISDN Primary Rate Access Facility.

Simulated Facility Group

1. A Simulated Facility Group is a software-defined register used to limit the number of simultaneous calls with specific attributes.

2. The CPE used by customers subscribing to PRI must comply with ISDN Primary Rate Interface specifications as designated by the Telephone Company.

3. Service Capabilities

PRI provides the capability to:

a. Transport customer information in the form of circuit-switched voice or data up to 64 kbps over any B channel.

b. Allow, where available, one D channel to control up to 20 PRI Arrangements. In such cases, a single D channel in one PRI Arrangement handles all the signaling and control requirements of multiple PRI Arrangements in a specific grouping, allowing supplemental PRI Arrangements to consist of 24 B channels.

c. Allow B channels to be allocated for specific services, such as Direct Inward Dialing (DID), Direct Outward Dialing (DOD), Wide Area Telecommunications Service (WATS) and Toll Free Service, or optionally configure channels to access multiple services on a per-call basis.

(C) Indicates Change

Issued: October 4, 1999   Effective: December 3, 1999
INTEGRATED SERVICES DIGITAL NETWORK (ISDN) (Cont’d)

PRI SERVICE (Cont’d)

B. REGULATIONS (Cont’d)

3. Service Capabilities (Cont’d)

d. Allow the user to have access to the directory number of the calling party. Provision of per-call and line blocking capabilities is a function of the customer premises equipment and is the responsibility of the customer.

4. Conditions

This service is offered subject to the following conditions:

a. PRI is only available from serving central offices equipped with the necessary facilities to provide PRI service. Feature availability and service capabilities are dependent on the facilities and digital technology providing the service.

b. ISDN-compatible terminal equipment is required for operation. It is the customer’s responsibility to power and obtain such equipment.

c. PRI service does not preclude customers from originating or receiving circuit-switched voice calls from inside or outside either their serving central office or their Local Exchange Area. Where facilities are available, customers will be able to originate and receive circuit-switched data calls outside of their serving central office.

d. This tariff does not provide for the transmission of packet data on the B or D channels. Rates and charges for packet data on the B channels may be provided on an Individual Case Basis and will be sufficient to cover the appropriate incremental costs as determined by the Telephone Company. Packet data is not offered on the D channel.

e. Existing local usage or MTS rates apply to circuit-switched voice calls. Usage rates are applicable for each software-defined DOD, DID or business dial tone line provisioned on PRI.

(C) Indicates Change

Issued: October 4, 1999                                Effective: December 3, 1999
INTEGRATED SERVICES DIGITAL NETWORK (ISDN) (Cont’d)

PRI SERVICE (Cont’d)

B. REGULATIONS (Cont’d)

4. Conditions (Cont’d)

f. Circuit-switched data calls will be billed on a local usage-sensitive basis as specified in this tariff. Toll charges will apply when circuit-switched data calls are made outside of the customer’s Local Calling Area.

g. All PRI Arrangement configurations must have at least one 23B+D PRI Arrangement for signaling and control functions. A 23B + Backup D PRI Arrangement is required whenever more than 47 B Channels are controlled by a single D channel.

h. When more than one service is accessed over the same PRI Arrangement, Call-by-Call Service Selection may be required.

i. When, at the customer’s request, this service is furnished from other than the normal serving central office, charges for foreign central office and/or foreign exchange service will apply as specified in this tariff.

5. Features

The following optional features are available with PRI:

   This is purchased as part of 23B + Back-up D PRI Arrangement.

b. Call-by-Call Service Selection—Provides an option to the Dedicated B Channel Configuration allowing B channels to be configured to access multiple services on a per-call basis. With this optional feature, separate facilities are not needed for individual services such as DID, DOD, WATs, Toll Free service and business dial tone lines. The customer premises equipment signals the local serving central office as to what type of service to access for each call.
INTEGRATED SERVICES DIGITAL NETWORK (ISDN) (Cont’d)

PRI SERVICE (Cont’d)

B. REGULATIONS (Cont’d)

5. Features (Cont’d)

c. Calling Line Identification—Allows the user to have access to the directory number of the calling party. Provision of per-call and line blocking capabilities is a function of the customer premises equipment and is the responsibility of the customer.

C. RATE REGULATIONS

1. Application of Rates

a. Business dial tone line functionality is included in the PRI Service rates and charges.

b. Existing tariff rates, charges and regulations for DID service apply, where required. This includes DID numbers and line connection charges. Tariffed DID line connection charges apply for each DID line provisioned on the PRI Arrangement.

c. Customers accessing WATS or Toll Free Service via PRI are also subject to the rates and charges shown in those tariffs.

d. Circuit-Switched Data Usage Allowances

Circuit-Switched Data service is offered on an optional monthly allowance basis. For minutes of use or fractions thereof over the monthly allowance specified for Circuit-Switched Data Usage Allowances, charges apply as specified following.

(C) Indicates Change

Issued: October 4, 1999    Effective: December 3, 1999
C. RATE REGULATIONS (Cont’d)

2. Additions to Service

During the contract period, the customer may add PRI services at the same monthly rate as specified in the initial contract. The contract period for these additional services will end coterminous with the initial contract.

3. Changes in Future Contract Rates

If the monthly rates on a contract are lowered, the subscriber may be allowed to cancel their existing contract without penalty, providing they sign-up for a new contract of equal or greater monetary value. The subscriber will be subject to all terms, conditions and prices of the new contract.

4. Renewal Options

Prior to the expiration of the existing contract period, a customer may extend the contract for another contract period without incurring termination liability charges. The new contract will indicate the designated rates then in effect. The new contract period must be for a period of time which is equal to or greater than the length of the original contract. The number of PRI Arrangements must be equal to or greater than the number of arrangements contained in the original contract. The contract period effective date will be the date the customer signs the new contract.

5. Relocation

When a customer elects to relocate his PRI service to a different premises not served by the same central office, prior to the expiration of a contract period, the service is considered to be disconnected, and the termination liability applies. However, if the customer relocates to a location served by the Telephone Company and establishes a PRI contractual payment plan of equal or greater monetary value, the customer may relocate without incurring any termination liability. Installation charges for establishing the new service would apply.

INTEGRATED SERVICES DIGITAL NETWORK (ISDN) (Cont’d)

INDIVIDUAL LINE BUSINESS BRI SERVICE

A. GENERAL

Individual Line Business BRI is an optional service arrangement for use with Individual Line Business Exchange Service. BRI uses the Basic Rate Interface (BRI) arrangement of the Integrated Services Digital Network (ISDN). The regulations, rates and charges contained herein are in addition to the applicable Individual Line Business Exchange Service arrangements specified in the Telephone Company’s Intrastate Local General Tariff.

B. REGULATIONS

1. Explanation of Terms

Basic Rate Interface (BRI) Arrangement
BRI Arrangement provides ISDN capabilities from an ISDN-equipped switch in the central office. The BRI Arrangement consists of up to two “B” channels and one “D” channel (2B+D) which are defined as:

B Channel

The B channel is a 64 kilobit per second (kbps) channel used for information transfer between users. The B channel may be used in conjunction with circuit-switched service.

D Channel

The D channel is a 16 kilobit per second packet-switched channel that carries signaling and control for the B channels.

Circuit Switching
Circuit Switching is a switching technique in which an entire circuit or, in a digital switch equipped for ISDN, a specific selection of time slots is dedicated to a given call.

Electronic Key Feature Package

The Electronic Key Feature Package offers for one installation charge and one monthly rate all of the Electronic Key Features described in 5. following.

(C) Indicates Change

Issued: October 4, 1999
Effective: December 3, 1999
INTEGRATED SERVICES DIGITAL NETWORK (ISDN) (Cont’d)

INDIVIDUAL LINE BUSINESS BRI SERVICE (Cont’d)

B. REGULATIONS (Cont’d)

1. Explanation of Terms (Cont’d)

Featured Voice BRI Access

Featured Voice BRI Access uses only one B channel of the ISDN architecture for providing voice access and includes the Electronic Key Features in 5. following.

Integrated Services Digital Network

Integrated Services Digital Network (ISDN) describes the end-to-end digital telecommunications network architecture, which provides for the simultaneous access, transmission and switching of voice, data and imaging services. These functions are provided via channelized transport facilities over a limited number of standard user-network interfaces. The ISDN architecture consists of digital switching systems which connect Basic Rate Interface lines to their serving central office.

Basic Rate Interface (BRI)

BRI is an optional service arrangement, which can be used in conjunction with a customer’s Individual Line Business Exchange Service. It uses the ISDN architecture to provide the customer with the capabilities of simultaneous access, transmission and switching of voice, data and imaging services via channelized transport. In addition, BRI provides the customer with the availability of the service capabilities and features described in 3., 5. and 6. following.

Multiple Access BRI

Multiple Access BRI utilizes both B channels of the ISDN architecture for either voice or circuit-switched data. Multiple Access BRI is also required when only one B channel is utilized for circuit-switched data or alternate voice/data. Voice service purchased on Multiple Access BRI does not include the Electronic Key Features. These features must be purchased separately.

(C) Indicates Change
INTÉGRÉ SERVICES DIGITAL NETWORK (ISDN) (Cont’d)

B. REGULATIONS (Cont’d)

1. Explanation of Terms (Cont’d)

Network Interface

ISDN Basic Rate Interface is comprised of a limited set of standard user-network interfaces. The BRI customer premises equipment (CPE) located at the customer premises must be compatible with the Telephone Company-designated network interface. This interface is defined as follows:

A two-wire interface is the physical interface between a switch equipped with ISDN and the network termination (NT1). The NT1 is customer premises equipment which is necessary for terminating a telephone facility at the customer premises.

Secondary Directory Number

An ISDN Secondary Directory Number (SDN) is a software-defined number that is assigned to a station with an actual telephone number and provides the user with the capability to originate and receive calls over the SDN. SDN calls utilize the same facilities as the primary directory number. Originating calls assume the characteristics of the station that the SDN is assigned to. Customers subscribing to Individual Line Business BRI must comply with ISDN Basic Rate 2 Interface specifications established by the Telephone Company.

3. Service Capabilities

Customers may configure Individual Line Business BRI using the following service capabilities:

a. Featured voice on the B channel(s).
b. Circuit-switched data on the B channel(s) at speeds up to 64 kbps.
c. Alternating circuit-switched voice and circuit-switched data on the same B channel.
Section 6

Pennsylvania Telephone Company
Original Sheet 32

INTEGRATED SERVICES DIGITAL NETWORK (ISDN) (Cont’d)

INDIVIDUAL LINE BUSINESS BRI SERVICE (Cont’d)

B. REGULATIONS (Cont’d)

4. Conditions

This service is offered subject to the following conditions:

a. Circuit-switched voice usage charges generated by an Individual Business Exchange Service Line equipped with BRI will be charged in accordance with the Local Usage Package to which the customer subscribes as specified in the appropriate Telephone Company Exchange Service Tariff.

b. Circuit-switched data calls will be billed on a local usage-sensitive basis as specified in this tariff. Toll charges will apply when circuit-switched data calls are made outside of the customer’s Local Calling Area.

c. ISDN-compatible terminal equipment is a requirement for operation. It is the customer’s responsibility to obtain and power such equipment.

d. ISDN charges are in addition to applicable rates and charges associated with Individual Line Business Exchange Service.

e. This service is available from central offices which have the necessary facilities to provide ISDN service on the standard ISDN network platform.

The customer’s service location must be within the distance limitations determined during installation of the service in the sole judgment and discretion of the Telephone Company. When a customer requests ISDN service and requires the installation of additional facilities due to exceeding the distance limitations as determined by the Telephone Company and where, in the judgment of the Telephone Company, it is practical to provide such facilities, the customer will be charged rates and charges based on the cost of providing the necessary additional facilities, in addition to the rates and charges specified in C. following. These charges for any additional facilities required will be computed on an Individual Case Basis.

f. Electronic Key Feature availability is dependent on the facilities providing the service. No credit is given on the package rate for features where facilities and appropriate digital technology are not available.

(C) Indicates Change
INTEGRATED SERVICES DIGITAL NETWORK (ISDN) (Cont’d)

INDIVIDUAL LINE BUSINESS BRI SERVICE (Cont’d)

B. REGULATIONS (Cont’d)

4. Conditions (Cont’d)

g. Electronic Key Features may be selected individually or as feature packages on a per-service basis. With the exception of Multiple Call Appearances and Shared Call Appearances for a Directory Number, rates and charges for Individual Line Business BRI service provide for single appearances of Electronic Key Features on the same channel. If the customer desires multiple appearances of the same electronic key feature, other than Multiple Call Appearance or Shared Call Appearances for a Directory Number, on the same channel, rates and charges as specified elsewhere in this tariff will apply for all appearances other than the first appearance.

h. Individual Line Business BRI service does not preclude the Individual Line Business Exchange Service customer from originating or receiving circuit-switched voice calls from inside or outside either his/her serving central office or his/her Local Calling Area. Where facilities are available, the customer will be able to originate and receive circuit-switched data and packet-switched data calls outside of his/her serving central office.

i. Calls identified as circuit-switched data will be billed at Circuit-Switched Data Usage rates even if the customer’s equipment establishes the call as circuit-switched voice service and then transmits 56 kbps or 64 kbps circuit-switched data.

j. This tariff does not provide for the transmission of packet data on the B or D channels.

(C) Indicates Change

Issued: October 4, 1999
Effective: December 3, 1999
Electronic Key Features provide the customer with the ability to access the following features where available:

a. Automatic Exclusion

Automatically inhibits other stations from picking up a call on hold or bridging onto a call that is active at that station. This feature must be used in conjunction with Shared Call Appearances for a Directory Number.

b. Call Pickup—Originating and Terminating

Allows a station user to answer any call within an associated predetermined pickup group. If more than one line within the pickup group has an unanswered incoming call, the call to be answered is selected by the switching system.

c. Drop

Allows the user to drop the last party added to a conference call. For a two-party call, this will terminate the call. This feature must be used in conjunction with three-way calling. Three-way calling charges will apply as specified in the Telephone Company’s appropriate tariff.
INTEGRATED SERVICES DIGITAL NETWORK (ISDN) (Cont’d)

INDIVIDUAL LINE BUSINESS BRI SERVICE (Cont’d)

B. REGULATIONS (Cont’d)

Electronic Key Features (Cont’d)

d. Feature Function Button

Allows the user to assign certain features to a particular button on his/her ISDN set. When depressed, the button will activate the assigned feature.

e. Hold

Allows the user to place a call on hold.

f. Individual Calling Line Identification

Allows the user to have access to the directory number of the calling party. Per-call and line blocking capabilities will be available as described in this tariff.

g. Key System Coverage for Analog Lines

Allows an ISDN set to provide call coverage for an analog set.

h. Multiple Call Appearances of a Directory Number

Allows the user to have more than one appearance or his/her directory number assigned to his/her set, providing the capability of multiple incoming or outgoing calls associated with that directory number. Multiple incoming calls to this directory number can be terminated to the telephone if idle call appearances are available to accept the calls.

i. Outgoing Called Line Identification for ISDN Sets

Provides a user originating a call with Information about the called party and the facility or destination

RATES

1. Rate Regulations

BRI Access

(1) Service Capability Charges

(a) Monthly Rate

Monthly rates for Service Capabilities apply per Service Capability provided.

(b) Product/Service Charge

The Product/Service Charge applies per termination for the installation or the move of each BRI access arrangement.

(2) Change Charge

The Change Charge applies per Individual Line Business BRI Service configuration for customer requested changes to or addition of call appearances, adding or changing features in an existing configuration group, and adding or changing BRI features.

(3) Configuration Group Charge

The Configuration Group Charge applies per configuration group established in excess of one group on the initial establishment of BRI and any configuration group requested after the initial establishment of service.

INTEGRATED SERVICES DIGITAL NETWORK (ISDN) (Cont’d)

RESIDENTIAL BRI SERVICE

A. GENERAL

Residential BRI Service is an optional service arrangement.

Residential BRI Service uses the Basic Rate Interface (BRI) Arrangement of the Integrated Services Digital Network (ISDN).

B. REGULATIONS

1. Explanation of Terms

Residential Basic Rate Interface (BRI) Arrangement

Residential BRI Arrangement provides ISDN capabilities from an ISDN equipped switch in the central office. The BRI Arrangement consists of two “B” (Bearer) channels and one “D” channel (2B+D) which are defined as:

B Channels

The B channels are 64 kilobit per second (kbps) channels used for information transfer between users. The B channels may be used in conjunction with circuit-switched service.

D Channel

The D channel is a 16 kilobit per second packet-switched channel that carries signaling and control for the B channels Circuit Switching. Circuit Switching is a switching technique in which an entire circuit or, in a digital switch equipped for ISDN, a specific selection of time slots is dedicated to a given call.
Issued: October 4, 1999
Effective: December 3, 1999
INTEGRATED SERVICES DIGITAL NETWORK (ISDN) (Cont’d)

RESIDENTIAL BRI SERVICE (Cont’d)

B. REGULATIONS (Cont’d) 1. Explanation of Terms (Cont’d)

Residential Features Package

The Residential Features Package includes all of the Residential Feature listed in 5. following for one monthly rate.

Integrated Services Digital Network

Integrated Services Digital Network (ISDN) describes the end-to-end digital telecommunications network architecture, which provides for the simultaneous access, transmission and switching of voice, data and image services. These functions are provided via channelized transport facilities over a limited number of standard user-network interfaces. The ISDN architecture consists of digital switching systems, which connect Basic Rate Interface lines to their serving central office.

Residential Basic Rate Interface (BRI)

Residential BRI is an optional service arrangement. It uses the ISDN architecture to provide the customer with the capabilities of simultaneous access, transmission and switching of voice, data and imaging services via channelized transport. In addition, Residential BRI service provides the customer with the service capabilities and features described in 3. and 5. following.

Multiple Access Residential BRI

Multiple Access BRI utilizes the B channels of the ISDN architecture for either circuit-switched voice, circuit-switched data or alternate circuit-switched voice and data.
Residential BRI Service

B. Regulations (Cont’d)

1. Explanation of Terms (Cont’d)

Network Interfaces

ISDN Basic Rate Interface is comprised of a limited set of standard user-network interfaces. The BRI customer premises equipment (CPE) located at the customer premises must be compatible with the network interface. This interface is defined as follows:

A two-wire interface is the physical interface between a switch equipped with ISDN and the network termination (NT1). The NT1 is customer premises equipment, which is necessary for terminating a telephone circuit or facility at the customer premises.

Additional Directory Number

An ISDN Additional Directory Number (ADN) is a software defined number that is assigned to a station with an actual telephone number and provides the user the capability to originate and receive calls over the ADN. ADN calls utilize the same facilities as the primary directory number and originating calls assume the characteristics of the station to which the ADN is assigned.

2. Customers subscribing to Residential BRI Service must comply with National ISDN Basic Rate Interface specifications as specified by the Telephone Company.

3. Service Capabilities

Customers can configure Residential BRI Service using the following service capabilities:

a. Circuit-switched voice on the B channel(s).

b. Circuit-switched data on the B channel(s) at speeds up to 64 kbps per B channel

c. Alternating circuit-switched voice and circuit-switched data on the same B channel(s).
INTEGRATED SERVICES DIGITAL NETWORK (ISDN) (Cont’d)

RESIDENTIAL BRI SERVICE (Cont’d)

B. REGULATIONS (Cont’d)

4. Conditions

This service is offered subject to the following conditions:

a. Circuit-switched data and voice calls in a customer’s local calling area will be billed on a local usage-sensitive basis as specified in this tariff in C.2. Local circuit-switched voice calls will be billed on a per message basis as specified in this tariff in C.2. Toll charges, as specified in the appropriate Telephone Company Message Toll Service Tariff, will apply when circuit-switched data and voice calls are made to points outside of the Local Service Area.

b. ISDN compatible terminal equipment is a requirement for operation. It is the customer’s responsibility to obtain and power such equipment. If a power failure occurs at the service location and the terminal equipment used by the customer does not have a battery backup, the equipment will not operate and contact with emergency services such as 9-1-1 will not be possible.

c. Residential BRI Service is available only from central offices, which have the facilities necessary to provide Residential BRI Service on the standard ISDN network platform. However, the customer’s service location must be within distance limitations determined in the sole judgment and discretion of the Company. When a customer requests ISDN service and requires the installation of additional facilities due to exceeding the distance limitations determined by the Telephone company, and, where, in the judgment of the Telephone Company, it is practical to provide such facilities, the customer will be charged rates and charges based on the cost of providing the necessary additional facilities, in addition to the rates and charges specified in C.2. following. These charges for any additional facilities required will be computed on an Individual Case Basis.

d. Residential BRI Service does not preclude the customer from originating circuit-switched voice calls to, or receiving circuit-switched voice calls from, inside or outside of the customer’s serving central office or Local Service Area. Where facilities are available, the customer will be able to originate circuit-switched data calls to, and receive circuit-switched data calls from, outside of the customer’s serving central office.

f. Residential Features availability is dependent on the facilities providing the service. No credit is given on the package rate for features which are not available because facilities and appropriate digital technology are not in the serving central office.

(C) Indicates Change

RESIDENTIAL BRI SERVICE (Cont’d)

B. REGULATIONS (Cont’d)

4. Conditions (Cont’d).

f. Residential Features may not be selected individually. With the exception of Multiple Call Appearance and Shared Call Appearances for a Directory Number, rates and charges for Residential BRI Service provide for single appearances of Residential Features on the same channel.

g. Residential BRI Service provides access to two circuit-switched “B” channels. D channel packet data service is not included in this tariff offering.

h. Residential BRI Service will be installed only at a residence location. Residential BRI Service will be provided on no more than three lines at a given residence location. Residential BRI Service will not be provided at a location if other service provided by the Company at that location is solely Business Service. Use of Residential BRI Service is not restricted to use of only a residence nature. Customers subscribing to Residential BRI Service will be provided Residence Service directory listings in accordance with Company tariffs and will not be eligible for Yellow Pages listings.

5. Residential Features

Package Residential Features

Package provides the customer with the ability to access the following features where available. Use of these features requires customer-provided ISDN compatible CPE and/or software.

a. Automatic Exclusion

Automatically inhibits other stations from picking up a call on hold or bridging onto a call that is active at that station. This feature must be used in conjunction with Shared Call Appearances for a Directory Number.

b. Drop

Allows the user to drop the last party added to a conference call. This feature must be used in conjunction with three-way calling.

c. Feature Function Button

Allows the user to assign certain features to a particular button on the user’s ISDN set. When depressed the button will activate the assigned feature.

d. Hold

Allows the user to place a call on hold.

e. Individual Calling Line Identification

Allows the user to have access to the directory number of the calling party.

f. Key System Coverage for Analog Lines

Allows an ISDN set to provide call coverage for an analog set.

g. Multiple Call Appearances of a Directory Number

Allows the user to have more than one appearance of the user’s directory number assigned to the user’s set, providing the capability of multiple incoming or outgoing calls associated with that directory number. Multiple incoming calls to this directory number can be terminated to the telephone if idle call appearances are available to accept the calls. Analog sets may have only one call appearance.

h. Outgoing Called Line Identification for ISDN Sets

Provides the user originating a call with the number of the called party.

1. Application of Rates

a. Residential BRI Access

(1) Service Capability Charges

(a) Monthly Rate

Monthly rates for Service Capabilities apply per Service Capability provided.

(b) Installation Charge

The Installation Charge applies per termination, for installation or the move of the BRI Access.
INTEGRATED SERVICES DIGITAL NETWORK (ISDN) (Cont’d)

RESIDENTIAL BRI SERVICE (Cont’d)

C. RATES (Cont’d)

1. Application of Rates (Cont’d)

b. Multiple Access

(1) Circuit-Switched data and voice usage rates in excess of “Multiple Access” package usage allowance are based on day-of-week and time-of-day use. Charges for usage in excess of package usage allowance are as follows for each B channel used for data or voice. 7 AM - 7 PM Monday through Friday = 2 cents per minute or fraction of a minute. All other times = 1 cent per minute or fraction of a minute.

(2) Multiple Access Residential BRI packages are as follows:

   I10/20 Package includes 20 hours per month of total B channel voice or data usage.

   I30/60 Package includes 60 hours per month of total B channel voice or data usage.

   I70/140 Package includes 140 hours per month of total B channel voice or data usage.

   I150/300 Package includes 300 hours per month of total B channel voice or data usage.

   I250/500 Package includes 500 hours per month of total B channel voice or data usage.

   Unlimited Package includes unlimited hours per month of total B Channel voice at data usage. Usage for each B Channel will be recorded separately and usage for both channels will then be added together to arrive at total B channel usage.

c. Point to Multipoint Access

A physical connection in which a single network termination supports multiple terminal equipment devices. Charges are per Service Profile Identifier (SPID) device over and above the two SPIDS provided.

1. GLOSSARY OF TERMS

Host Telephone Company: The service provider, which is also the telecommunications public utility that provides 9-1-1 service to the county/municipality, and that houses the Automatic Location Identification (ALI)/MSAG data used for providing 9-1-1 service.

Telephone Company: A telecommunications public utility regulated by the Pennsylvania Public Utility Commission and which has or requests access to the county/municipality 9-1-1 system or connection to the serving selective router, including, but not limited to, local exchange carriers and competitive local exchange carriers. This term is synonymous with ‘service provider’.

Content: The data elements of the MSAG including (but not necessarily limited to) the data elements that are entered into the following fields A-I of a standard MSAG record:

A. Tax area record
B. Locality
C. Street
D. Thoroughfare
E. Directional [where required]
F. Even (E), odd (O), or all (A) [applied to house numbers]
G. Low-high range of house numbers
H. PSAP (Public Safety Answering Point)
I. LAT/LONG (Latitude/Longitude) [where required]

Formatting, Format: Shall include changes to the identity of fields, order of fields, and number and arrangement of data elements in each field, and a telephone company’s rearrangement or regrouping of such data, without changing the MSAG content, for purposes of validating against MSAG records.

2. REGULATIONS

A. The Telephone Company will comply with the Protocols as set forth in, and in the form of, Service Provider E-9-1-1 Protocols, Service Provider E-9-1-1 Questionnaire and Testing Procedures in accordance with the Petition of Bell Atlantic-Pennsylvania, Inc. for a Declaratory Order (MSAG); Docket No. P-00971203; Settlement Agreement of all Parties and Joint Petition entered August 7, 1998.

B. The Telephone Company is indemnified under the Public Safety Emergency Telephone Act, Act 78 of 1990.

C. The Telephone Company’s liability and insurance provisions are fully stated in Pa. P.U.C. No. 2, Section 1, General Regulations.

D. Cases of Service interruptions affecting public health and safety shall receive priority attention under any and all conditions, particularly in time of disaster. Every appropriate resource will be utilized. The service provider will make reasonable best efforts to have its system fully functional as soon as possible, unless conditions beyond the service provider’s control prevent service restoration.

Issued: September 6, 2000  Effective: September 7, 2000
911 TARIFF LANGUAGE

2. REGULATIONS (cont’d)

E. The service provider will not use the county’s/municipality’s MSAG for any purpose that is not directly related to and required for the provision of 9-1-1 service.

F. The Host Telephone Company will install the county’s/municipality’s MSAG in ‘read/write’ format and will not modify the content of the MSAG unless requested or permitted to do so by the county/municipality. A request to modify content by the Host Telephone Company shall be responded to by the county/municipality within (10) business days or the request is deemed to be approved. The request shall be in writing and shall set forth in reasonable detail the proposed modification and all reasons in support. The request shall be granted provided the modification is necessary for the Host Telephone Company’s provision, maintenance, or upgrading of the 9-1-1 service.

G. The Telephone Company shall not otherwise modify the content of the MSAG, but may make formatting changes approved by the county/municipality necessary to enable the MSAG to conform to the telephone company’s information system(s). The request shall be in writing and shall set forth in reasonable detail the formatting changes and all reasons in support. The county/municipality shall respond to the request in ten (10) business days or the request is deemed to be approved. The request shall be granted provided the formatting change does not impair the integrity and accuracy of the MSAG database. For the purposes of this regulation, a content or formatting change does not include the use of the MSAG content in telephone companies’ operational support systems to validate customer information for input to the ALI database.

H. The service provider will not sell, lease, rent, loan or provide, or transfer the county’s/municipality’s MSAG to any other person(s) or entity(ies) without the express written authorization of the county’s/municipality’s 9-1-1 coordinator, or his or her designee.

I. The Telephone Company will not, without the written consent of the county/municipality, modify or create any derivative of the county’s/municipality’s MSAG, except as follows: one (1) mirror image copy of the MSAG may be made in electronic form for archival purposes (the copy may be made in read/write format by the host telephone company, but shall be made solely in read-only format by all other telephone companies), and the telephone company may make a mirror image copy, solely in read-only format and only for database reconciliation, address verification for new connections of service, and other functions that are necessary to ensure that the name and address information provided by the service provider to the county/municipality is accurate and conforms to the county’s/municipality’s MSAG format.

Issued: September 6, 2000 Effective: September 7, 2000
PAY TELEPHONE LINE SERVICE

3. GENERAL

7. Pay Telephone Line exchange service is one-party exchange service for use by pay telephone providers, location owners and interexchange carriers and is furnished solely for connection with coin, coinless, or combination coin/coinless pay telephone equipment to the Telephone Company’s network.

8. Pay Telephone Line Service:

3. Is available in all exchanges of the Company; foreign exchange service is not available to these lines.

4. Provides for one listing in the white pages and one listing in the yellow pages of the Telephone Company directory for each Pay Telephone Line furnished. However, Non-published Number Service or Non-Listed Number Service at no charge are also available to Pay Telephone Line customers.

5. Only one coin-operated or coinless public access telephone unit may be connected to each Pay Telephone Line.

6. Will be provided on a dial-tone-first basis to enable end users to dial certain calls without requiring coin deposits, i.e., all emergency calls, telecommunications relay service calls, and non-sent paid calls.

7. Service will be provided on a two-way basis, except lines for which a specific exemption has been granted by the Pennsylvania Public Utility Commission.

8. The pay telephone provider is responsible for meeting all federal, state and local statutes with respect to provision of pay telephones in accordance with all hearing impaired and handicapped person requirements.

9. Temporary suspension of service (vacation service) is not available for Pay Telephone Line Service.

10. Pay telephones connected to a Pay Telephone Line must be registered in compliance with Part 68 of the FCC’s rules and Regulations.

11. Each pay telephone connected to a Pay Telephone Line must be capable of providing user call completion to 911 Universal Emergency Service, if available. If 911 service is not available, the pay telephone must permit access to the operator.

Issued: March 18, 1997
Effective: April 15, 1997
PAY TELEPHONE LINE SERVICE (cont’d)

1. GENERAL (cont’d)

12. Failure of the subscriber to comply with the provisions of this Tariff may result in the suspension or disconnection of the subscriber’s service.

2. REGULATIONS AND RATES

1. Pay Telephone Line Service is provided at the corresponding exchange’s one-party business line rate as contained in the Telephone Company’s, Tariff - Telephone PA P.U.C. No. 2, Section 2.

2. Where measured service is available in a given exchange, the business measured service rates apply to Pay Telephone Line Service.

3. Line Connection charges listed in Section 3 of this Tariff apply to Pay Telephone Line Service.

4. The business touch tone rate applies to Pay Telephone Line Service, if requested by the customer.

5. Directory assistance charges of $0.50 per call apply to Pay Telephone Access Lines. (I)

6. Pay Telephone Line Service customers will not be charged for non-published or non-listed telephone numbers. However, a non-recurring charge applies for each change of telephone number required to establish a non-published or non-listed number.

7. All subscribers to Pay Telephone Service shall have the right to select their presubscribed intraLATA toll provider at such time that intraLATA presubscription is available in the Company’s service territory.

3. AVAILABLE FEATURES FOR PAY TELEPHONE SERVICE

1. Optional call screening/blocking/coin supervision functions, as listed below are provided at the monthly rates stated. The non-recurring charges shown below do not apply to initial installations, but do apply to subsequent requests made by the customer.

(I) Indicates Increase

Issued: February 26, 1999   Effective: February 27, 1999
PAY TELEPHONE LINE SERVICE (cont’d)

3. AVAILABLE FEATURES FOR PAY TELEPHONE SERVICE (cont’d)

1. Incoming/Outgoing Screening - prevents completion of collect or third number calls to the Pay Telephone Line. Originated operator-handled calls from the Pay Telephone Line are restricted to collect, third number or calling card only.

2. Incoming Blocking - blocks all incoming calls.

3. Outgoing blocking - restrict outgoing calls to non-sent paid call only (coinless).

4. Coin Supervision Additive - provides for the collection, return, recognition, announcements and pre-prompting for overtime; monitors signals from the pay telephone equipment to identify when and what denomination of coins are deposited; identifies the status of attempted calls and sends a signal to the pay telephone equipment to collect the appropriate coins when calls are completed, or returns coins when calls are not completed.
